2017 Catalog

Prices valid until 9-1-2017 Mike Watkins, Owner

Welcome! Our goal is to provide the highest quality garden seed, flower seed, sweet potato plants and "Pussy Willow" cuttings at affordable prices to home gardeners. Owner, Mike Watkins has over forty years of experience in the seed industry. Mike and his wife Pattie manage and operate the family business.

Enclosed is information on vegetables, Heirloom vegetables, herbs, flowers, sweet potato plants and pussy willow cuttings available for spring 2017 planting. For more detailed descriptions of each variety, please visit our web site.

We are very happy to offer seed of several non-hybrid vegetable varieties from the **Heirloom Collection** of Dr. David Bradshaw (Retired) Horticulture Dept., Clemson University. Professor, researcher, speaker and avid gardener, Dr. Bradshaw has been collecting heirloom varieties for over fifty years.

Many of the varieties we offer were developed by state agricultural experiment stations and USDA plant breeders nationwide. We also offer several outstanding varieties released by private companies as well as many varieties that have been organically grown. Look for the **Organic** and/or **Heirloom** following the variety name. **All varieties are open-pollinated unless designated "Hybrid"**. Some hybrid seed may be treated with a fungicide to enhance germination.

ALL THE SEED WE SELL ARE NON GMO.

All variety information presented is based on average performance compiled from numerous sources. Varietal performance can be expected to vary depending on geographic location, time of planting, climate, soil and cultural practices. **We suggest you contact your local extension agent to determine if a variety is adapted to your area and for detailed planting instructions.**

Tolerance/resistance T/R indicates the ability of the plant to endure or restrict the activities of a specific pest or pathogen. Some diseases can change from one year to the next; therefore T/R can vary from year to year. Aggressiveness of the pathogen, amount of pathogen present, and environmental conditions influence degree of T/R. New races or strains may also occur.

All of our seed and plants are produced under strict standards to insure they are true to type and have good germination. Sweet potato plants will be shipped as noted in Mid-May to early June. Availability of all seed and plants is subject to production and demand. In the event we are out of a variety we will substitute a similar variety or refund your money for that item. **Check our web page for updates on availability and changes.** You may also order securely online using your credit card or PayPal account. **Thank you for your order!**

**NOTE: PKT = Packet (approximate number of seed)
If you have problems with any of our seed, please contact us!**

Study to show thyself approved unto God, a workman that need not be ashamed, rightly dividing the word of truth. 2 Timothy 2:15, KJV

ARTICHOKE Green Globe 88 days. Perennial **Heirloom** grown by Thomas Jefferson. Sharp spines and globe-shaped heads. Transplant into the garden after the last frost, cut back in the fall and mulch to protect from the cold. **PKT (50) \$2**

ASPARAGUS Mary Washington Heirloom introduced by USDA in 1949. Spears are uniform, tender, thick, heavy, straight, dark green with purplish tip. 3-4 years to establish, first picking in 2 years **PKT (300) \$2**

GREEN BEANS Blue Lake 274 Snap (Bush) 54 days. **Heirloom** Excellent eating quality. Produces heavy yields of 6" pods containing white seeds. Pods fill slowly retaining tenderness for a long period. Resistant to bean mosaic and is widely adapted. An excellent variety for canning and freezing. **PKT (100) \$2 ½ LB \$5**

Contender (Bush) Heirloom 42 days. 1949 Clemson University & USDA release. Combination of good flavor, disease resistance, and high yields. Has excellent fresh eating quality. Fairly hardy under adverse conditions. Resistant to common bean mosaic virus (race 1) and tolerant of powdery mildew. **PKT (100) \$2 ½ LB \$5**

Dwarf Horticulture Taylor Bush (65 days) AKA "Speckled Bays" or "Cranberry Bean". Pre-1800 **Heirloom**. Thick and flat 5-6" pods are mottled with red in the shell stage. Use as green shell bean or as a dry bean. Does well in cool climates. **PKT (100) \$2 ½ LB \$5**

Golden Wax Bush 50-60 days. Flat yellow wax, fairly stringless pods. Good flavor, eat fresh or can. **PKT (100) \$2 ½ LB \$5**

Mascotte (Bush) 2014 AAS Winner. Dwarf 16"-18" upright plants excellent for patio containers. 6" long round, stringless beans with medium green color. Resistance to anthracnose & pseudomonas. **PKT (25) \$2**

Provider (Bush) 50 days. Pods are round, medium dark green. 5-6" pods, tender, low in fiber and slow to wilt. Performs well under temperature extremes. Excellent disease resistance. Compact 20" plants. Released 1965 by Clemson Univ/USDA. **Organic PKT (100) \$3**

Roma II (Bush) 59 days. A high yielding, disease-resistant, "Italian type" snap bean, Roma II is stringless, tender, meaty and flavorful. Has light green, smooth, flat 4-6 inch pods. Slow to develop seed and fiber, ensuring high eating quality for three weeks or longer. Superb for canning and freezing. **PKT (100) \$2 ½ LB \$5**

Royalty Purple Pod (Bush) 52 days. Produces 5" round, stringless, purple-podded snap beans. Plants have short runners and need either wide row spacing or a fence for climbing. **Heirloom Organic PKT (100) \$3**

Tendergreen (Bush) 52 to 54 days. **Heirloom** introduced in 1922. Tolerant to mosaic. Vines medium large, 18-20" tall. Pods 5-6" long, nearly round, green, tender, stringless with rich flavor. Can or freeze. Dark purple seed mottled with tan. **PKT (100) \$2 ½ LB \$5**

Build ye houses and dwell in them and plant gardens and eat the fruits of them. Jeremiah 29:5

Blue Lake Pole 65-75 days. Vigorous 7 ft. tall **Heirloom** made Oregon's Willamette Valley famous in the 1960s for canning beans. The straight, smooth, dark green 6" pods are crisp and stringless. Harvested at their peak, they are tender, meaty, and full of hearty, fresh bean flavor. Use fresh as snap or shell beans, canned, frozen or dried.

PKT (100) \$2 ½ LB \$5 Organic PKT (100) \$3

Cherokee Trail of Tears Pole (*Phaseolus vulgaris*) 85 days. **Heirloom** also known as Cherokee Black. Cherokee ancestors carried this bean over the Trail of Tears, the infamous winter death march from the Smoky Mountains to Oklahoma (1838-1839), leaving a trail of 4,000 graves. Green 6" pods with purple overlay, shiny jet-black seeds. Good for snap beans and dry beans. **Pole habit**, snap or dry. **PKT (50) \$2 (200) \$6**

Greasy Cut Short Pole **Bradshaw Heirloom Collection** Source: Dick Baird, Pickens, SC. Cut Short beans are said to have derived their name because the seeds grow so closely together in the pods that the seed ends are flattened or "cut short". This variety has a slick or "greasy" pod. Excellent for fresh consumption, but in earlier times it was a favorite for drying as "leather breeches beans". Often seen strung like peppers on a string hanging on the porch, the beans were soaked in water overnight to reconstitute before cooking slowly for hours with a ham hock for flavoring. **Trellis** this variety. **Organic PKT (50) \$3 (150) \$6**

Juanita Smith Pole **Bradshaw Heirloom Collection** Mr. Oliver Ridley, Mtn. Rest, SC grew this bean for almost 50 years after receiving it from Juanita Smith, who had grown it for 50-60 years before. He often planted them among his field corn to provide them a trellis. Plants produce an abundant crop of medium sized round beans with black & white appaloosa speckled seed. Tender round pods are useful in French style bean recipes and salads. **Organic PKT (50) \$3 (150) \$6**

Kentucky Wonder Pole **Heirloom** 65 days. An old **brown** seeded favorite introduced before 1864. Resistant to bean rust. Round pods are about 8 inches long, stringless and tender when small. Use fresh, can, freeze, or as a dry bean. **PKT (100) \$2 ½ LB \$5**

McCaslan Pole 66 days. An old Southern **Heirloom** favorite introduced in 1912 by the McCaslan family of Georgia. All-purpose stringless bean, superior quality and prolific producer. Green pods are up to 8" long Use as snap (green or string), shelled or dry bean **PKT (100) \$2 ½ LB \$6**

Rattlesnake Pole 60-85 days. **Bradshaw Heirloom Favorite** This bean probably derived its name from the dark brown and light brown to cream mottling on the seed reminiscent of a rattlesnake's color. It also has striking purple striped markings on the growing pods, which will disappear when the bean is cooked. Good for both fresh consumption and for canning. This bean is esteemed by people who enjoy a "shelly bean". The 7-8" pods remain tender even after seeds are developing within the pod. It is a vigorous grower and a prolific producer when provided a sturdy trellis and sufficient water. **PKT (50) \$2 ½ LB \$7**

Turkey Gizzard Pole **Bradshaw Heirloom Collection** Source: Mr. and Mrs. Joe Newton, Clemson, SC. In 1802 a settler in Kentucky killed a wild turkey. While cleaning the turkey, he discovered two unusual seeds in the gizzard. Curious to see what they might produce he planted them. Very vigorous growing, the turkey gizzard bean should be provided a sturdy trellis and planted early. This bean is well suited to canning and has a tasty nutty flavor when cooked. Attractive marshmallow cream and brown appaloosa pattern seeds. **PKT (50) \$3 PKT (100) \$5**

Zelma Zesta Pole From the **Heirloom** collection of Rodger Winn, organic heirloom seed producer in SC. The pole bean was developed by his wife's uncle J. C. Metzger over 70 years ago. This **Heirloom** is best used when pods are pencil size. It is very productive and produces reliably in the summer months here in the South. Pods have purple markings and 6 1/2" to 7" long with 6-8 seeds per pod. Vines 7'- 8'. Seeds are tan with brown specks. **Organic PKT (50) \$3 (150) \$6**

Mountaineer White Half Runner 60 days. Use this **Heirloom** as snap beans when young and shell beans at late maturity. Four inch, slender pods are round, light green and fiberless at all edible stages. White seed have a rich "beany" taste. **PKT (100) \$2 ½ LB \$6**

Pink Half Runner 50 days but many gardeners leave at least part of the crop on the vines for 85 days and watch the dark green pods slowly turn red as they mature. A beautiful snap bean that can be enjoyed fresh off the vine, canned or dried. Peanut bean taste **PKT (100) \$2 ½ LB \$6**

State Half Runner 55-60 days. Short, 3' semi-vining plants produce 4" light green, short, flat oval, meaty but stringy tender pods that have a sweet, bean taste. Popular in the south as a shelling bean but may also be used as a snap or green bean. Can or freeze.. High yielding, bushy vines do not require staking. White seeded. **PKT (100) \$2 ½ LB \$6**

LIMA or BUTTERBEANS **Cangreen Bush** 68 days. **Heirloom**. Small, flat, light green seed. 1943 AAS winner. **PKT (150) \$2 ½ LB. \$5**

Christmas Pole 85-90 days. **Heirloom** also known as the Calico Lima Bean. Introduced to the US in 1840. Long season lima bean grown primarily for its beautiful seeds which are light cream color variegated in a deep maroon. Aggressive plants may reach heights of well over 10 feet and must be trellised. The plants produce an abundance of 4 - 6" pods containing 4 or 5 beans. The beans can be used either shelled or dry and turn a pink-brown color when cooked. The beans have a rich, buttery flavor which is milder than other lima bean varieties. **PKT (50) \$2 ½ LB. \$5**

Fordhook 242 Bush 75 days. **Heirloom** All America Selection 1945. Widely adapted large seeded. Well suited for fresh market, canning or freezing. 3-4 plump beans per pod. **PKT (50) \$2 ½ LB. \$5**

Griggs Sieva Pole **Crop Failure - Not available in 2017 - Sorry**

Henderson Bush 65 days. Early maturing **Heirloom** baby lima for market and home gardens. Very productive for canning and freezing. Pods are 3-4" with 3-4 creamy white seeds. Introduced 1888. **PKT (100) \$2 ½ LB. \$5**

Jackson Wonder Bush 65 days. An early, drought hardy and heat resistant medium size **Heirloom** lima for processing and home gardens. Pod is 3.25" long, broad and flat. Seed are buff-brown with dark reddish brown mottling. Bush plant height – 20 in. **PKT (100) \$2 ½ LB. \$5**

Loudermilk Pole Butterbeans **Bradshaw Heirloom Collection** Similar to another butterbean called 'Snow on the Mountain'. It is half snow white with the remainder spotted in sharp contrast with black. Prolific producer requires a trellis and produces until frost in the fall. New growth runners later in the season. Shear to increase pod set. **PKT (50) \$3 (100) \$5**

Multicolored Pole Butterbean 85 days. **Heirloom** small seeded variety with great flavor and good disease resistance. Rainbow of colors with speckles and swirls of cream, beige, red-brown and violet-purple. **Organic PKT (50) \$3 (100) \$5**

Willowleaf Pole Butterbeans **Bradshaw Heirloom Collection** This running butterbean variety has been in the family of Dr. Bradshaw for 150 years. Unlike most butterbeans, the leaves of this variety are very slender and willow shaped. This makes picking the beans easier and also discourages the Mexican bean beetle. Pods often produce four beans, and sometimes five beans per pod. Late summer sidedressing with nitrogen and irrigation will stimulate a vigorous fall crop. A stout trellis is recommended for this vigorous bean which produces right up to the first frost. Best flavor if used fresh or frozen. **PKT (50) \$2 (150) \$5**

But if we walk in the light as Christ is in the light, we have fellowship with one another and the blood of Jesus Christ His Son cleanses us from all sin. 1 John 1:7

BUTTER PEA (Lima) Dixie White Bush Butter Pea 70 days **Heirloom** 16-24" **bush** variety. Does well in hot, dry weather. Early and productive. Delicious, butterbean flavor. Excellent flavor and highly regarded in the South. **PKT (150) \$2 ½ LB \$5**

Speckled Dixie Bush Butter Pea 75 days. Southern favorite. Produces **bushy**, vigorous two foot plants with tremendous yield of slightly curved, 4" long pods with 3-4 small reddish-brown beans mottled with a darker brown color. Wonderful used fresh or dried. **PKT (150) \$2 ½ LB \$5**

Alabama Speckled Pole Butter Pea 70 days. **Heirloom** The first speckled pole butter pea I've found. Vigorous plants that reach about ten feet in height and give a tremendous yield of slightly curved, 4" long pods with 3-4 speckled beans. **PKT (50) \$3**

Whitfield Pole Butter Pea Bradshaw Heirloom Collection First selected as a rogue off-type from other garden vegetable seeds in 1950 by the late Levis Whitfield of Anderson, SC. This variety was passed on to his son, Donnie Whitfield. Donnie grew them until his death in the 1990's. Since that time they were preserved in a home freezer until his niece, Deborah, shared them with us. We found them to be very prolific and quite tasty. A running vine type that needs to be trellised. For best results, plant 18-24" apart. **Organic PKT (50) \$3 (100) \$5**

MISC BEANS Black Turtle Bush 90 days. Latin America **Heirloom** dating back to the 1700's. **Bush** plants produce small jet black beans wonderful for soups, stews and refrying. **PKT (100) \$2**

Envy Vegetable Soybean 75 days. Well established short season favorite developed by E. M. Meader, UNH. Upright 2' tall plants bear a good crop of bright green beans early for fresh shelling or freezing. Eaten in the fresh shell stage, green seeded soybeans have a delicious, buttery flavor and tender-firm texture. Better adapted to Northern growing conditions than lima beans, and have more protein and better yields. **PKT (100) \$3**

Pinto Bush 95 days. Pods are three to four inches long, flat, and green. Can be used for snap beans when young and tender but primarily grown to maturity and used as a dry bean **PKT (100) \$2 ½ LB \$5**

Scarlet Runner Pole 65 days. **Ornamental-Heirloom** dating back to 1750. Good for use as either small snaps, sliced pods or green shells, and often used in place of lima beans in cooler climates. Also, grown as an ornamental. The vining plants require a trellis. Rich red-orange pea shaped flowers cover the vines most of the summer. **PKT (15) \$2**

Yardlong or Noodle Asparagus Pole Bean – 75 days. This **Bradshaw Heirloom Favorite**, is actually in the same species as cowpeas. Brought to America in the 1880s by Chinese emigrants working on the railroads. Frequently the two feet long slender, tender pods are harvested in the immature stage and stir fried in oriental dishes. Use the mature seeds as "dry peas" with a piece of ham hock. Wait to plant until at least the first week in July for more vigorous growth and less chance for insect damage. Prefers the hottest summer days and produces prolifically in late summer-early fall. **PKT (50) \$3 (100) \$5**

BEET Bull's Blood 60 days. European **Heirloom** Tasty, sweet, dark red roots may be pickled, baked or frozen. Beautifully colored, tender and sweet tops mature in 35 days. Use in gourmet salads. **PKT (500) \$2**

Chioggia 60 days. Also called Bull's Eye, this **Heirloom** was introduced to American gardeners in the late 1840's from Italy. Uniquely beautiful flesh has alternating red and white concentric rings that resemble a bull's-eye. Very tender, nice for eating and pickling. Retains markings if baked whole and sliced just before serving. Mild flavored tops can be used raw or cooked. **PKT (500) \$2**

Cylindra (Butter Slicer or Formanova) 45-80 days. This Danish variety produces a 6-8" carrot shaped beet making it ideal for slicing. Produces many more uniform slices than globe shaped varieties. Sweet, tender, and smooth skinned with small, edible, reddish green tops. **Organic PKT (300) \$2**

Detroit Dark Red 60 days. Introduced in 1892, this **Heirloom** may be the most popular garden variety today. 3" globe shaped, smooth roots with dark red flesh, sweet and excellent quality also store well. Red stemmed green tops highly regarded for taste. **PKT (500) \$2**

Early Wonder 50 days. This **Heirloom** was introduced in the early 1900's and is a great all-purpose beet. Roots are crimson red flesh and flattened globe-shaped. Succulent tops are dark green. **PKT (500) \$2**

Green Top Bunching 52 days. 12" plant produces good yields of bright red beets and bright green tops. Quality **Heirloom** suitable for slicing and dicing. **Organic PKT (300) \$2**

Lutz Green Leaf 76 days. This very sweet, old-fashioned **Heirloom** is an excellent keeper. 4-6" slightly elongated roots are deep purple and retain sweetness and texture even when large. Spring sown beets are harvested in the fall. Fall leaves are tender enough to be used in salads. An all-purpose for fresh use and the best for fall harvest and winter storage. **PKT (500) \$2**

Ruby Queen NEW 55 days. Early, round, smooth-skinned **Heirloom** with a smooth buttery texture. Great for canning and pickling. 1957 AAS winner. **PKT (500) \$2**

BROCCOLI Calabrese 60-80 days. **Heirloom** introduced in the 1880's by Italian immigrants. Produces edible side shoots after the 4-6" central head is harvested. Good choice for freezing. **PKT (1000) \$2**

Di Ciccio 50-70 days. Old reliable open pollinated **Heirloom** introduced in 1890. Compact plants (24-36") produce a central 3-4" head with numerous side shoots. Excellent for fall planting. **Organic PKT (500) \$2**

Purple Sprouting 60 days. Grown by the Romans, this **Heirloom** has been grown in England for two hundred years. Plant produces very flavorful heads of purple broccoli that turn green when cooked. Once the main head is removed this variety will continuously produce many offshoots during the season. Also can be used as a sprouting broccoli. Plant late winter/early spring. Excellent for garnishes or using fresh in salads. Extremely easy to grow hardy winter vegetable. **PKT (250) \$2**

Waltham 29 60-90 days. Widely adapted **Heirloom**. Developed to mature in cold weather (fall planting). Produces 4-8" heads and lateral buds for extended harvest. Good for freezing. **PKT (1000) \$2**

Broccoli Raab Spring Rapini 90-120 days. *Brassica rapa ruvo* Traditional Italian **Heirloom** combines qualities of mustard greens and broccoli for salads and light cooking. There is no central head but many strong leaves and side shoots with coin size green buds both of which are harvested. Best grown in spring and summer months but will not tolerate more than a light frost in autumn. Cut and bunch entire plants or pick just buds for extended harvest. **Organic PKT (250) \$2**

BRUSSEL SPROUTS Catskill 90-110 days. Introduced in 1941, this widely adapted **Heirloom** is still the best garden variety for sustained production. Compact plants (20-24") produce dark green, large 1½" sprouts, closely packed on the stem. **PKT (500) \$2**

Long Island 95-110 days. **Heirloom** dating back to the 1890s. Vigorous, compact plant (24-30 in.) loaded with excellent yields of 1-2 inch round, tight, dark-green sprouts over an extended period. Succulent and tender when steamed. Best for late fall and winter harvests as a few frosts will improve the flavor. A good variety for freezing. **PKT (500) \$2**

CABBAGE Charleston Wakefield 82 days. Popular Heirloom with cabbage lovers since 1892. Produces 4-6 lb. heads. **PKT (1000) \$2**

Danish Ballhead 100 days. Heirloom introduced in 1887. Produces 5-7 pound round, blue-green, 7-8" diameter heads. A dependable variety, resists bolting and splitting and keeps until late spring. **PKT (1000) \$2**

Early Flat Dutch *NEW* 80 days. Large (6-10 lbs.) flat heads perfect for sauerkraut and storage. Plant in spring or fall. **PKT (1000) \$2**

Large Flat Dutch *NEW* 95 days. Solid 12" flat-topped, blue-green heads that average 12 lbs. Heirloom introduced in the US in 1860's. Excellent flavor, good keeper, perfect for sauerkraut and any cabbage dish. **PKT (1000) \$2**

Jersey Wakefield 75 days. This Heirloom had its origin in England in the late 1700's first grown in Jersey City in 1840. Generally grown for summer harvest but does over-winter well. 7" green tender heads weigh 3-5 lbs. and have an excellent flavor **PKT (1000) \$2**

Michihili Chinese *NEW* 70 days. Produces tall, cylindrical leafy heads 16" long and 6" across. Excellent for stir-frying and pickling. **PKT (500) \$2**

Pak Choi White Stem 45 days. Forms 8-12" wide celery like stalks. Large and smooth green leaves have a mildly pungent flavor. Grows fast. Slow to bolt. Use stalks and leaves in stir-fry and soups **PKT (500) \$2**

Purple Savoy *NEW* 60 days. Early savoy with green heads and purple leaf margins. Plant in spring or fall (cold tolerant). **PKT(500)\$2**

Red Acre Heirloom 75-100 days. Compact plants produce solid, flavorful, 5-7" diameter, round, flattened, red-purple colored 2-4 lb. heads Resistant to yellowing and splitting. **Organic PKT (300) \$2**

Savoy Perfection 90 days. Heirloom Tender, sweet, crinkled leaves. Large crisp heads with mild flavor. **PKT (500) \$2**

CARROT Chantenay Red Cored 70 days. Heirloom, developed in France in the 1830's, has 5" long, tender, sweet, bright orange roots. Adaptable to heavy soils. **PKT (2000) \$2**

Danvers 126 72 days. Stocky Heirloom with broad shoulders up to 2" wide & tapered V-shaped 6-8" root. Roots are bright, deep-orange. Suitable for canning, freezing, storing, and juicing. Thrives in heavy soils and tolerates some heat. **PKT (2000) \$2** **Organic PKT (1000) \$2**

Little Finger 50-60 days. Baby Heirloom gourmet carrot, color develops quickly, can pull early, 3" long x 1" wide, cylindrical blunt roots, very small core, smooth skin, deep orange color, small weak tops. Developed for canning & pickling whole, must be harvested early. **PKT (2000) \$2**

Mokum 60 days. **Hybrid** Excellent choice for the home garden. Very juicy, sweet, almost coreless, early bunching with slender 6" roots. Fine "baby" carrot due to its high sugar content & rapid coloring. **PKT (300) \$2**

Nantes Heirloom 70 days. For over 100 years Nantes type carrots have been a favorite of home gardeners for their flavor & attractive appearance. Cylindrical roots are 1½" x 6" with a blunt end. Orange flesh, nearly coreless, sweet, tender and crisp. Good for storage, freezing and juice. **PKT (2000) \$2** **Organic PKT (1000) \$2**

Parisian Carrot 60 days. Deep orange oval shaped Heirloom carrot that will grow in heavy soils. Excellent for containers. **PKT (1000) \$2**

Rainbow Blend Heirloom 70 days. A colorful mixture of red, orange, purple, white and yellow baby carrots. **PKT (300) \$2**

Tendersweet *NEW* 75 days. Reliable Heirloom carrot produces crisp, sweet, rich orange colored, 6-9" roots with 1 ½ diameter and semi-blunt end. **PKT (2,000) \$2**

CAULIFLOWER Snowball Self-Blanching 68 days. Heirloom developed at MSU. A work-saving variety with self-wrapping leaves which protect the white curds from heat and sunlight during late summer or early fall. During hot weather growth slows until cooler weather arrives, thus preventing formation of undersized heads. **PKT (500) \$2**

Snowball Y Improved 75 days. Heirloom plant produces very flavorful, pure white, 6" diameter heads. This is a self-blanch variety as the leaves curl around heads protecting them from sun. **Organic PKT (300) \$2**

CELERY Tall Utah 52-70 110 days. Heirloom released in 1953 Tall Utah produces 11" stalks on plants that reach 24-30" in height and medium dark green, crisp, tender and tasty. A very popular tall green celery for late fall use and winter storage. **Organic PKT (500) \$2**

CHICORY Sugar Loaf *Cichorium intybus* 80 days. Sugarloaf type chicory with highly desirable cos-type heads. For summer or fall culture, mild flavor, self-blanching. **PKT (1000) \$2**

COLLARDS Champion 78 days. Improved Vates Selection. Dark Green and large cabbage-like leaves retain springtime eating quality up to two weeks longer than other Vates types. **PKT ½ OZ (2500) \$2**

Georgia Southern 80 days. 30-35" tall, upright, large blue-green crumpled leaves. Leafy non-heading Heirloom plant. **PKT ½ OZ (2500) \$2**

Morris Heading aka *Cabbage Collards* 80 days. Heirloom Produces leaves in a head similar to a cabbage in taste and appearance. The medium green leaves are tender and delicious. Tolerant of heat and cold. **PKT ½ OZ (2500) \$2**

Vates 75 days. Heirloom Large dark green leaves with mild cabbage like flavor. **PKT ½ OZ (2500) \$2**

CORN-Open Pollinated

Hickory King White Dent 115 days. Heirloom dating back to 1875. 7-9 foot plants. 7-8" ears with 10-12 rows of large *white* kernels. Considered one of the best varieties for hominy, it can also be used for roasting ears, grits, or corn meal. **PKT (150) \$2** **½ LB. \$5**

John Haulk Corn Bradshaw Heirloom Collection Source: Oliver Ridley, Mountain Rest, SC. This hardy Heirloom *yellow* corn has been grown in the foothills of SC for over 100 years. Mr. Ridley gave this variety to Dr. Bradshaw in 1992 and had grown this corn for over 50 years. He obtained his seed from John Haulk who had grown it for over 50 years in the same area. A hardy corn which grows to 12-15 feet tall, it is suitable for table use, excellent for grinding for corn meal, and also makes an excellent animal feed. It is very resistant to both insects and to damage by molds, rot, etc. Dr. Bradshaw has grown this corn several years and especially enjoys grinding it for corn meal. Plants should be spaced two feet apart and hilled to prevent lodging during high winds. **PKT (100) \$3** **(200) \$5**

Mountain Rest White Favorite Bradshaw Heirloom Collection 115 days. 12 ft. tall plants. 12-18" ears. Suitable for table use & corn meal. **PKT (100) \$3** **(200) \$5**

Pencil Cob 80-100 days. Sometimes called Tennessee Red Cob corn. This southern Heirloom has existed since the late 1800's. Produces yellow shoepeg kernals. The plants are very sturdy and are often grown in an intercropping system to provide support for pole beans. Each ear is medium large in size. Excellent for roasting ears. **PKT (150) \$2** **½ LB. \$5**

Reids Yellow Dent 85-110 days. This productive, hardy **Heirloom** corn was a prize winner at the 1893 World's Fair. Developed by James L. Reid in northern Illinois from a Gordon Hopkins cross his father brought from Brown County, Ohio in 1846. Vigorous 6-7' plants with 9-10" well-filled ears. **Use for roasting ears. PKT (150) \$2 ½ LB. \$5**

Truckers Favorite White 115 days. **Heirloom** 8-9' plants produce 8-10" ears. Grind for flour or use for livestock feed. **PKT (150) \$2 ½ LB. \$5**

Indian 100-110 days. Rainbow colored Indian corn. **PKT (150) \$2**

Strawberry 100 days. Crimson-mahogany colored with 2-3" ears that look like a strawberry. Good as popcorn or ornamental uses. **PKT (100) \$3**

South American Popcorn NEW 110 days. **Heirloom** produces 5' tall plants with 2-3 ears. 12-14 rows of big orange/yellow kernels excellent for popping. **PKT (200) \$2 ½ LB \$6**

SWEET CORN-Open Pollinated

Country Gentleman Heirloom 92 days. Often called "**Shoe-peg**". Popular in Mid-Atlantic region for over 100 years. 6-8" ears are tightly packed with round, white, deep kernels arranged in irregular fashion instead of rows. Sweet, white and milky kernels with a wonderful flavor. Freeze or make cream style corn. Eat or freeze immediately after harvest while sugar is highest. **PKT (100) \$3 (200) \$5**

Golden Bantam (8 Row) 7 in. ears, two per stalk. Early main crop for the home garden with excellent sweet flavor. This **Heirloom** has been the standard **yellow** sweet corn for American home gardens for more than 100 years. **PKT (100) \$3 (200) \$5**

Stowell's Evergreen 80-100 days. **Bradshaw Favorite** The original strain of this **open-pollinated Heirloom** was bred by Nathaniel Newman Stowell and introduced by a "so-called" friend to the seed trade in 1848. After 150 years, this variety is still one of the leading **white** varieties for home gardens and market growers. 7-9" ears with 14-18 rows of kernels, 1-2 ears per stalk. **PKT(100) \$3 (200) \$5 ½ LB \$10**

HYBRID SWEET CORN HYBRID SWEET CORN

Merit Hybrid. 80 days. This widely adapted variety has been a favorite for over thirty years. Large uniform heavy ears, well filled with straight rows of deep, narrow, bright **yellow** kernels of excellent flavor. Sugar converts to starch rapidly after harvest. Plants 6-7' tall are vigorous and very productive. T/R: bacterial wilt, common smut, corn leaf blight and one strain of maize dwarf mosaic virus.

Treated Seed PKT (150) \$3 ½ LB. \$10

Silver King Hybrid. 84 days. If you like Silver Queen then consider this sugar enhanced home garden winner! Matures 10-12 days earlier than Silver Queen. Sturdy 6' plants with fancy 8" ears with **white** kernels. Good disease tolerance. **Treated Seed PKT (150) \$3 ½ LB. \$10**

Silver Queen Hybrid. 94 days. After more than 30 years, Silver Queen remains a favorite late white corn. The 8 inch ears fill to the tip with 14-16 rows of tender, sweet **white** kernels with excellent flavor. Kernels contain moderate degrees of sugar and convert to starch rapidly after harvest. **Treated Seed PKT (150) \$3 ½ LB. \$10**

CUCUMBER Arkansas Little Leaf 55 days. The parthenocarpic flowers (sets fruit without pollination) produce fruit under heat stress. Medium-sized, blocky fruits. Slicing and pickling. **Organic PKT (50) \$2**

Armenian Cucumis melo var. flexuosus 60-70 days. **Heirloom** from the 1400's. Slender burpless fruit is usually about 3' long and 3" diameter. Tastes and looks like a cucumber but is a variety of melon. Best used when 12-18". Thrives in hot weather. **PKT (100) \$2**

Ashley 66 days. 1956 Clemson University **Heirloom** is recommended for hot, humid areas. Productive vines produce 7-8 inch dark-green fruits, tapered on the stem end. **PKT (100) \$2**

Boston Pickling Improved 55 days. Released in the late 1800's. A dependable **Heirloom** variety that bears over a long period of time if kept picked. Blocky, bright green fruits perfect for pickling **PKT (100) \$2**

Bush Pickle NEW 50 days. **Heirloom** 24"-36" vines are great for small gardens or containers. Produces 4"-5" long fruit. **PKT (20) \$2**

Calypso 56 days. High yielding pickling **hybrid** developed by N.C. State Univ. Blocky shape, medium dark green, white spines. Compact plant. Excellent disease resistance/tolerance. **PKT (50) \$2**

Carolina 55 days. **Hybrid** pickling cucumber with medium dark green, straight, well-shaped, white spined fruit. Resistant to a broad disease complex. Developed by Clemson University. **PKT (100) \$2**

Diva Tender, crisp, sweet, bitter-free and seedless AAS winner. Best eaten small (4-6"). Gynoecious and parthenocarpic. **PKT (20) \$2**

Lemon 65 days. This unique **Heirloom** was introduced in 1894. The small, lemon shaped cucumbers are pale yellow when mature, with mild, crisp, white flesh. Use for pickling, slicing and in salads. Very easy to digest. **PKT (100) \$2**

Long Green Improved 65 days. This **Heirloom** dates back to the mid-1800's. Vigorous and productive plants produce 10-12" dark green fruits with black spines. Excellent slicing cucumber. **PKT (50) \$2**

Marketmore 76 68 days. Open-pollinated slicer developed by Cornell University. Fruit: very dark green color, 8-9", straight, uniform. T/R: cucumber mosaic, scab, powdery & downy mildew. **PKT (100) \$2**

Muncher 62 days **Heirloom** Strong, vigorous vines that prolifically produce smooth, tender 6-9". Good slicer that does not get bitter and is burpless. Mosaic virus resistance. **PKT (50) \$2**

Poinsett 76 65 days. Slicing type. Fruit: dark green, 7-8", smooth, cylindrical with well-rounded ends. Heavy yielder. **PKT (100) \$2**

Spacemaster 80 60 days. **Heirloom** Dwarf bush type plants produce 8" fruit with excellent flavor and disease resistance. Use for salad or pickles. Ideal for containers. Excellent disease resistance/tolerance. **PKT (50) \$2**

Straight Eight 65 days. This **Heirloom** was a 1935 All American winner. Smooth, straight, dark green, 8" fruits. A good slicing variety. **PKT (50) \$2**

Sumter 50 days. Standard for pickles. Straight, symmetrical green fruits to 6" are tasty & firm. Good disease resistance & very productive. Developed by Clemson University. **Organic PKT (50) \$2**

Suyo Long Sweet flavored, bitter free, ribbed fruits growing up to 15" long. This long fruited variety should be trellised. Widely adapted. **PKT (20) \$2**

Tasty Green Burpless 62 days. Japanese "Burpless" monoecious variety. Fruit has shallow ridges on dark green skin, 12" long, slender and gets snake-like if grown on the ground. **PKT (20) \$2**

Tendergreen Burpless 60-65 days. 8-10" fruit are dark-green, non-bitter, acid free. Resistant to downy & powdery mildew. **PKT (50) \$2**

White Wonder 60 days. **Heirloom**, dates back to 1893, matures to a lovely ivory white color. Pick small for pickles. Very productive in hot weather. **PKT (100) \$2**

EGGPLANT Black Beauty 80 days. **Heirloom** introduced in 1902. Fruits are dark purple, high-quality, 6-1/2" long by 5" in diameter and may weigh 3 lbs. (best when harvested smaller). **PKT (100) \$2**

Long Purple 80 days. Italian type 24-30" plants produce four or more 2" in diameter and 8-10" in length, dark purple fruit. **PKT (100) \$2**

ENDIVE Batavian 90 days. 1934 AAS **Heirloom** produces large, thick, dark green, frilly 10-12" leaves. Compact head and easy blanching. Tasty, tender with a pleasant flavor. **PKT (1000) \$2**

Frisee or Curly NEW 80 days. Produces loose heads of greenish-yellow, frilly, curly leaves with a mild, slightly bitter taste. Favorite in salads for texture and flavor. Blanching (tying the heads with a string) yields a milder taste. **PKT (500) \$2**

Green Curled Ruffec 80-100 days. This **Heirloom**, dating back to 1870, is hardy and resistant to wet and cold weather. 'Frisee' type with deeply cut, dark green leaves. Sow in summer or fall. **PKT (1000) \$2**

GOURDS Birdhouse Bradshaw Heirloom Selection Dr. Bradshaw has selected for 40 years for shape and rind thickness. The "perfect" Martin house. **PKT (10) \$2**

Bottle Lagenaria siceraria 100-120 days. Originated in Africa dating back to 3500 BC. This **Heirloom** is easy to grow and almost free from disease and insect attacks. **PKT (15) \$2**

Bushel Lagenaria siceraria 120 days. Gigantic 3-4' feet in diameter & weigh 50+ lbs. Excellent for making crafts. **PKT (15) \$2**

Healing Squash Bradshaw Heirloom Collection When young, fruit can be eaten as other squash. Source: Edith & Bill Gambrel, Clayton, GA. Although the common name of this vegetable is "squash", it is an edible *Cuccuzi* gourd. It originally came from Italy and has been maintained in the family almost 200 years. Like most other gourds, they are rampant growers and enjoy a stout trellis for best growth and fruit development. However, they will run freely over the ground. Pick when 6-10 inches long and use like summer squash. When young, half the fruit can be cut off for eating as other squash. Remaining fruit will heal itself and continue to grow, hence the name "healing squash". Fruit may reach 3-4 feet long and look like a club. **PKT (15) \$2**

Long Handle Dipper 120 days. Neck is long and makes a perfect handle when dried and the bulb end is cut into the shape of a dipper. **PKT (15) \$2**

Luffa Sponge Heirloom grown for many generations to provide natural sponge-like scouring pads suitable for scrubbing floors, automobiles, and are even used as shower sponges and for facials. The immature 5-6" fruits are edible and may be cut up and fried much like okra. Sponges obtained from the mature dried fruits will last for many years. This is a very aggressive vine and should be provided with a sturdy trellis in full sun. Rich green foliage with contrasting bright yellow flowers late into the season make this an attractive ornamental vine to screen off unsightly views. **PKT (25) \$2**

Ornamental Egg Gourds Bradshaw Heirloom Collection This delightful little ornamental gourd has been grown by Dr. Bradshaw over forty years. It has a vigorous habit of growth with rich green foliage, and it flowers prolifically. Displayed on a large trellis, its many snow white, egg-shaped fruit appear in marked contrast to the foliage. The dried gourds are almost indistinguishable from brown hen eggs and are quite useful for arts & crafts. **PKT (15) \$2**

And the earth brought forth grass and herb yielding seed after his kind, and the tree yielding fruit, whose seed was in itself, after his kind: and God saw that it was good. Genesis 1:12

KALE Lacinato 60 days. Italian **Heirloom** dates to the 18th century has blue-green, savoyed leaves 3" wide x 10" long. Ornamental as well as edible. Flavor is enhanced by frost, extremely winter hardy. Best quality is produced where summers are cool or when it is grown into the fall or winter. Best eaten when small and tender. **PKT (500) \$2**

Red Russian 40-60 days Popular **Heirloom** introduced in 1885. Very colorful and flavorful variety that grows 2' tall. Leaves are bitter-free, very tender, and are intersected by purple-pink veins, lightly tinged with purple on the margins. In cold weather the leaves turn reddish-purple and are very attractive. Produces an early crop of very tender, mild sweet flavored leaves. **Organic PKT (500) \$3**

Siberian 65 days Extremely hardy, rapid growing, huge blue green slightly curled feather shaped leaves, non-heading 12-16 inch plants. Sow spring or fall. Light frost improves tenderness and flavor. **PKT (1000) \$2**

Vates Blue Curled Slow bolting Scotch type, finely curled blue green leaves, low growing, 12-16" tall x 24" in diameter, short stem, hardy, especially tender after light frost, does not yellow from frost or heat, hardy, sow early spring-July, non-heading. **PKT (1000) \$2**

KOHLRABI Early White Vienna 50 days. 2" bulb is pale green with tender, white, crisp flesh. **PKT (500) \$2**

Purple Vienna 55 days. Crisp, 2-3" bulbs have tender, white flesh and colorful purple skins. **PKT (500) \$2**

LEEKS Large American Flag 130 days. One of the best varieties for many years. Thick necks, vigorous plants, outstanding quality with mild, sweet onion flavor. **PKT (500) \$2**

LETTUCE Black Seeded Simpson Heirloom 46 days. A real old timer (1850) still very popular. Loose, light green crinkly leaves retain their crisp, tender eating qualities longer than most other *leaf* lettuce varieties. Best for early spring and fall crops. **PKT (1000) \$2 Organic (1000) \$3**

Buttercrunch 65 days. 1963 All-America selection *butterhead* type released by Cornell University. Excellent for home gardens. Medium size head with smooth dark green crisp leaves. Slow bolting & heat tolerant. **PKT (1000) \$2 Organic (1000) \$3**

Cimmaron Romaine 60-70 days. **Heirloom** 10-12 inch deep-red heads, good flavor, crisp tender texture, virtually impervious to bolting. Broad, flat, crisp leaves range from dark red to bronze. **PKT (1000) \$2**

Dark Green Cos 70 days. Plant produces flavorful dark green heads of *romaine* lettuce. Leaves are loosely folded on heads. **PKT (1000) \$2**

Great Lakes NEW 75 days. 1944 AAS winner. This **Heirloom** produces large crisp heads or harvest young baby greens. Standard *iceburg* head excellent for spring and fall plantings. **PKT (1000) \$2**

Green Salad Bowl 50 days. 1952 All-America Selection released by USDA. This high-quality *loose leaf* type is ideal for home gardens. Large upright plants form a rosette of tender light green leaves. Slow to bolt. **Heirloom PKT (1000) \$2 Organic PKT(1000) \$3**

Iceberg (Head) 82 days. **Heirloom** Medium size, light green with a tinge of brown, tightly folded, crinkled. Crisp white interior. **PKT (1000) \$2**

Merveille Des Quatre Saisons (Four Seasons) NEW 45 days. Beautiful French **Heirloom** dating back to 1885. Produces medium to large *butterhead* plants. Crispy leaves are reddish-green with excellent flavor. **Organic PKT (1000) \$3**

Oakleaf 48 days. This *leaf* lettuce **Heirloom** dates back to 1771. Thin, light green, oak shaped leaves makes delicious addition to salads. Can stand some hot weather. **PKT (1000) \$2**

Parris Island Cos 66 days. Widely adapted **Heirloom Romaine** type developed by USDA & Clemson University. Upright 8-10" plants. Interior is pale green to cream with grayish green, slightly savoyed outer leaves. Mosaic tolerance. **PKT (1000) \$2 Organic PKT(1000) \$3**

Prizehead 50 days. Non-heading, *leaf* type. The leaves are upright, deeply curled, broad and light green. **Heirloom PKT (1000) \$2**

Red Deer Tongue Loose Leaf 50-70 days. Very popular **Heirloom** named for its pointed leaves with red edges. Heat tolerant and less prone to bolting under high temps. Good texture and rich nutty flavor. Widely adaptable and tolerant of different climates. Excellent for home gardens. **PKT (1000) \$2**

Red Romaine 70 days. Useful and colorful tart addition to any salad, 10-12 inch heads. Color varies from green to deep red to bronze. Dark color develops best in cool weather, gourmet variety. **PKT (1000) \$2**

Red Sails AAS winner. **Heirloom** Slow bolting ruffled, green *leaf* lettuce with ruffled, fringed leaves & burgundy tips. Resist tipburn. **PKT (500) \$3**

Red Salad Bowl 50 days **Loose leaf Heirloom** similar to Green Salad bowl with reddish-bronze color. Introduced in 1955. Attractive plants have a sweet flavor and are slow to bolt. **PKT (1000) \$2 Organic PKT(1000) \$3**

Rouge de Hiver Leaf 60 days. This heat tolerant European **Heirloom** dates back to 1880's. Large, flat, broad leaves vary in color (green, bronze, deep red) have a sweet buttery flavor. **Organic PKT(1000) \$3**

Ruby NEW 40-45 days. Compact **loose-leaf** plant with sweet, succulent, crumpled reddish-green leaves. Very decorative plant. **PKT (1000) \$2**

Speckles 40-45 days. Mennonite **Heirloom** dates back to 1799. Bright red speckles on lime green leaves with a buttery taste. This hardy **butter-head** type is slow to bolt. **PKT (500) \$2**

Summertime NEW 45 days. Heat tolerant **iceberg** type with dark green, wrapped leaves with frilled edges. **PKT (1000) \$3**

Tom Thumb 70 days. **Heirloom** dates back to 1850. Compact plants with small tennis ball sized **heads**. The sweet leaves are medium green, slightly crumpled with creamy yellow center. Easy to grow. **PKT (1000) \$2**

Tango 45 days. Attractive **loose leaf** plants form tight rosettes, with sharply cut leaves that resemble endive. Leaves are dark green with a tender tangy flavor and are high in vitamins. **PKT (500) \$2**

Colored Romaine Blend Red and green romaine lettuces. **PKT (1000) \$3 PKT (3000) \$6**

Gourmet Salad Mix A blend of red and green loose leaf lettuces. Even as seedlings their appearance is quite different and they can be easily thinned to your chosen proportions in the row. Sow small amounts regularly for a continuous harvest. Pretty enough for the flower garden. Matures in 60-80 days. **Organic PKT (1000) \$3 PKT (3000) \$6**

Mesclun Mix A blend of lettuce, mustard, arugula, endive, and kale. Wonderful combination of colors, textures and flavors provided by varieties that are quick to harvest. Plant short rows of mixture every week or so. Harvest all varieties and mix to make the perfect European style salad. **PKT (1000) \$3 PKT (3000) \$6**

MELONS Banana 80-100 days. **Heirloom** 18-24" long by 4" diameter yellow melons weighing 4-8 lbs. with juicy salmon-pink flesh **PKT (25) \$2**

Crenshaw 107 days. **Heirloom** Yellow-green skin with very sweet, salmon colored flesh. 6-10 pounds. **PKT (50) \$2**

White Crenshaw 100 days The creamy white, sweet flesh is well worth the wait on this variety. Lush foliage and delicious flavor. **PKT (50) \$2**

Delicious 51 81 days. 4-5 lb. fruit are round to oval, well netted, moderately ribbed. Flesh is thick, golden, crisp, juicy and delightfully sweet. **PKT (50) \$2**

Edisto 47 90 Days. **Heirloom** Firm, tough, ribbed rind with heavy net. Thick salmon-orange flesh with tender firm texture. 4-5 lbs. **PKT (100) \$2**

Green Nutmeg 70-90 days High yields of 2-3 pounds melons with slightly oval, ribbed, heavy netting, light green flesh with salmon center, sweet with a unique spiciness. **Heirloom** introduced in 1863. **PKT (25) \$2**

Hale's Best 85 days. **Heirloom** introduced in the 1920's. Large, (3-5 lbs) oval fruit. Thick, salmon-orange, very sweet flesh. Resists powdery mildew. **PKT (50) \$2**

Hearts of Gold 70-95 days. Aromatic sweet deep orange flesh very thick, firm, small cavity, nearly round 6.5 x 5.5". diameter, 3-4 lbs. **PKT (50) \$2**

Honeydew Green Flesh 105-115 days. Smooth, creamy white rind with high sugar content, luscious, thick green flesh. **PKT (50) \$2**

Honeyloupe 105 days. **Heirloom** Smooth 5-6 lb. fruit with sweet, delicious orange flesh. Taste between a honeydew and Crenshaw. **PKT (25) \$2**

Honey Rock 80 days. An early **Heirloom** melon, 3-4 lbs., thick sweet firm deep-salmon flesh. 1933 AAS winner. **PKT (50) \$2**

Iroquois 80-90 days. Coarse heavy net melon, oval shape, 7 x 6 in. diameter, 5-7 lbs. Thick, sweet deep orange flesh. Excellent choice for the mid-west and northeast. **PKT (50) \$2**

Mainstream 90 days. Small compact plant. 4 lb. cantaloupes with bright orange flesh high in vitamin C. This variety does well in wet or humid conditions. Rated by many as one of the best tasting cantaloupes of all time. Excellent for home gardens and market growers. **PKT (50) \$2**

Minnesota Midget Melon 60-100 days. **Heirloom** Compact, 3 ft. vines. 4" melons, thick meaty gold yellow flesh, unique flavor, high sugar content, high quality, fine dense netting, early, resistant to Fusarium. **PKT (50) \$2**

Planters Jumbo 86 Days. Fruits average 4 lbs., uniform, attractive, round-oval and well netted. Thick salmon-orange flesh. **PKT (100) \$2**

Plumgranny Melons Bradshaw Heirloom Collection Source: Edith and Bill Gambrel, Clayton, GA. Local gardeners grow these interesting little tennis ball size melons primarily to bring fragrance into the kitchen. I am told by old timers that the rind can be made into excellent preserves or pickles similar to watermelon rind pickle. **PKT (15) \$2**

Rocky Ford Green Flesh 85 days. Tasty **Heirloom** from the 1800's produces 5-6" melons with light green flesh & nutmeg flavor. **PKT (50) \$2**

Sakata's Sweet 90 days. These small 3"-4" Asian round melons are very sweet with high sugar content. Crisp and crunchy with edible skins. Small size & golden rind make them very attractive. **PKT (50) \$2**

MUSTARD Florida Broadleaf 45-55 days. Bright green, broad leaves with white midribs. Vigorous growing plant. **PKT ½ oz. (8000) \$2**

Mizuna 40 days. Large clusters of long, thin, crisp, deeply cut and notched leaves. Sweet and mild, great for stir-fry and salads. Slow to bolt. **PKT (2000) \$2**

Mizuna Lime Streaked 35-45 days. A popular type of Asian greens harvested as baby leaves used in Mesclun salad mixes. It has a mild sweet and tangy mustard flavor. Produces heavily serrated leaves on upright stalks & has a lime green color to its leaves. Upright habit makes for an easy harvest. Regrows after each shearing. **PKT (2000) \$2**

Mizuna Red Streaked NEW 35-45 days. Deep red color as baby leaf. Some green when grown to full size. Serrated leaves. **PKT (1000) \$2**

Osaka Purple NEW 22-50 days. Fast growing for spring or fall plantings. Dark green-purple leaves with white veins. Harvest small for salad or let it grow to full size for boiling. **PKT (1000) \$2**

Red Giant 50-70 days. An attractive, flavorful, oversized mustard. Slow to bolt and extremely winter hardy. **PKT ¼ oz. (4000) \$2**

Southern Giant Curled Heirloom 45-50 days. 1935 All-America selection. Vigorous upright plants. Bright green leaves with crumpled, frilled edges and mild flavor. Slow bolting. Use for salad, braising mix or cook. **PKT ½ oz. (8000) \$2**

Tatsoi Brassica narinosa 20-40 days Dozens of pencil thin, white stalks, and deeply cut fringed leaves, mild flavor, will grow after cutting. Very productive. **PKT (2000) \$2**

Tendergreen 40 days. "Spinach Mustard". Mild flavored, smooth and dark green leaves. Cook or use raw like spinach. **PKT ½ oz. (8000) \$2 Organic ¼ oz (4000) \$2**

OKRA Clemson Spineless 80 55 days. A uniform Clemson Spineless type released by Clemson University in 1980. The plants grow four to five feet tall. Pods are spineless, ridged, medium green, straight. Appearance, except for increased uniformity, is very similar to Clemson Spineless. **PKT (300) \$2 ½ LB. \$5 1 LB. \$8**

Burgundy 55-60 days. This AAS winner combines the value of a vegetable and beauty of an ornamental. Burgundy stems & branches with the green leaves having burgundy mid-ribs and venation. The flower is similar to a creamy yellow miniature hibiscus Dark red pods can be used in all okra recipes since the pods taste the same as green pods and lose the red color when cooked. Release by Clemson. **PKT (300) \$2 ½ LB. \$6**

Choppee Okra Bradshaw Heirloom Collection Source: Anne Diedre Jacobs, Georgetown, SC. This okra has been in the Jacobs family since the mid-1800's. As the name implies, it has been grown in the Choppee area of South Carolina near Georgetown. This area is named after Native Americans indigenous to this area. Because okra readily cross pollinates, it should not be grown in close association with other okra varieties. **PKT (50) \$2 (200) \$6**

Cow Horn 55 days. Pre-1865 Heirloom. A heavy yielder of 8-12 inch pods on plants that may reach 7 to 8 feet tall. Although the large pods remain spineless and tender up to 10 feet, the best quality pods are picked when 5 to 6" long. Heavy yielder with many side branches; and it can be depended upon to make a superb crop. **PKT (300) \$2 ½ LB \$6**

ONION Evergreen Long White Bunching 60-120 days. Clusters of long, slender, tasty stalks with "spring green" ends. Sow in spring for summer use or in fall to overwinter for spring. Divide clumps in second year. **PKT (1000) \$3**

PARSNIP All-America 90-120 days. Heirloom with smooth, ivory colored 10 x 3 inch roots with a tender white flesh and a very small core. Attains size and thickness early and rarely produces side shoots. Excels in taste, possesses a high sugar content and stores exceptionally well. The hardiest of all garden crops, parsnips don't develop their sweet, nutty flavor until after enduring frosts and cold weather in fall. **PKT (1000) \$2**

GARDEN/ENGLISH PEA Alaska 52-55 days. Contains less sugar and matures earlier than most other English peas. 28" plants are sturdy and grow well in cool weather. Smooth seed suitable for canning. **PKT (150) \$2 ½ LB. \$5**

Laxton's Progress #9 60 days-Early, long-podded garden pea has been a favorite for generations. 4-5". pods hold 6-9 plump, delicious dark green peas. Equally tasty fresh, canned or frozen. Vigorous 18-20" dwarf vines don't need staking. **Organic PKT(150) \$3 ½ LB. \$8**

Lincoln NEW 65 days. Heirloom Produces 6-9 seeds per 4" pod. Stands early heat and resist common wilt. Bush habit adapted for home garden and best choice for freezing. **PKT (150) \$2 ½ LB. \$5**

Wando 68 days. Heat tolerant for late plantings. Dependable cropper developed by USDA. Dark green 3" pods are well filled with 6-8 dark green peas. Excellent flavor. Bush habit adapted for home garden and quick freezing. **PKT (150) \$2 ½ LB. \$5**

Willet Wonder NEW 70 days. English type for fresh use or freezing. Heirloom originated in Augusta, GA in 1890's. **PKT (150) \$2 ½ LB \$5**

And the LORD God planted a garden eastward in Eden: and there He put the man whom He had formed. Genesis 2: 8

SNOW/SUGAR/SNAP PEA Dwarf Grey Sugar 55-60 days. Early maturing plants bear petite, edible **snow** peas. Plants 30-36" in height. Pea pods are sweet and crisp. Dwarf Grey is an old Heirloom favorite commonly used for its purple flowers and twirling tendrils in stir-fries, salads and garnishes. (*Pisum sativum*) **PKT (150) \$2 ½ LB \$5**

Mammoth Melting 75 days. Heirloom developed by USDA. By far the largest and finest of the **sugar/snow** or edible-podded peas. Vigorous 4-5' vines need to be trellised. Pods average 5-6" and are thick and fleshy and remain stringless and sweet longer. **PKT(100) \$2 ½ LB \$5**

Oregon Sugar Pod II Snow Light green, smooth edible pods 4" long by 3/4" diameter with a mild flavor good for eating raw, in stir fries or steamed. Freezes well, retaining the full, sweet flavor and color. Sets double pods, very productive vines over a long period of time. Height 30-36". 68 days. Good disease resistance. **Organic PKT(100) \$3 ½ LB \$8**

Sugar Ann Snap NEW 55 days. Dwarf non-climbing plant sets abundant harvest of 2½" sweet, crisp, stringless pods. 1984 AAS winner. **PKT(100) \$2 ½ LB. \$5**

Sugar Snap 70 days. This AAS Gold medal winner is the original snap pea. Crisp and tender 2-3 inch pods on 5-6 foot vines requiring a trellis. **PKT(100) \$2 ½ LB. \$5**

SOUTHERN PEAS (CROWDER & COWPEAS)
Some varieties not available until late February - CALL or email us for information. You may also visit our website to check for availability.

Baby Cream High yielding, early maturity, cream-type southern pea with a compact plant habit. Immature pods have a dark green color. Earlier and much less bushy than White Acre. **PKT (150) \$2**

Big Boy 75 days — The bushes stand erect and bear eight inch pods that are high on the plants and easy to pick. A very productive field pea that is good for fresh use, freezing or canning. Seed are cream colored with light brown eyes. **PKT (150) \$2 ½ LB. \$5 1 LB \$9**

California Black Eye 75 days. Heavy yields of 7-8" pods with large, smooth black eyed seed. Eat fresh or dried. **PKT (150) \$2 ½ LB. \$5**

Colossus Very large brown crowder with good flavor. Easy to pick and shell. Matures in 64 days and normally has a two-week harvest season. Colossus has rootknot and wilt resistance. Clemson Univ. release. **PKT (150) \$2 ½ LB. \$5 1 LB \$9**

Dixie Lee Heirloom 68 days. Longtime Southern favorite for its brown color, strong flavor & dark gravy (pot liquor) when cooked. High yielding ability. Prostrate plants 12" high with a spread of 42". Slender 7" medium green pods change to light yellow at green shell stage. Kidney shaped peas. Developed by MS AES. **PKT (150) \$2 ½ LB. \$5 1 LB \$9**

Iron & Clay Cowpeas Heirloom Excellent for quail, dove & deer, cover crop or human consumption as a dried pea. It produces forage in 45 days and small mature seed in 100 days. Iron & Clay produces abundant amounts of organic matter and nitrogen needed to enrich the soil and resists common forms of root-knot nematode (*Meloidogyne incognita*). **PKT (300) \$2 ½ LB. \$5 1LB. \$8**

Mississippi Purple Hull 70 days. A large seeded brown crowder with reddish-purple pods at green shell stage. Plants have much less vine and a concentration of pods over the plant with the pods maturing over a short time span. Pods shell very easily. **PKT (150) \$2 ½ LB. \$5 1 LB \$9**

Mississippi Silver 65 days. Large seeded brown crowder with pale green silvery pods at green shell stage. Pods 6" slightly curved & light straw color when dry. Low bushy plant type. Excellent yields. T/R: Blackeye mosaic virus & rootknot nematode. **PKT (150) \$2 ½ LB. \$5 1 LB \$9**

Piggott Pea Bradshaw Heirloom Collection Source: John Coykendall, Knoxville, TN. This variety of southern field peas dates back to the 1850's in Washington Parish, LA. For many years it was guarded by the Piggott family who would not allow anyone to have seeds of what they considered the very best tasting field pea. **Organic PKT (100) \$3 (200) \$5**

Pinkeye Purplehull 65 days. Plants are vigorous, bush to semi-vining in habit and produce pods that are six to seven inches long. The seeds are cream colored with a maroon eye. It is resistant to Blackeye Cowpea Mosaic Virus and Bacteria Virus Resistant (BVR). **Treated Seed Only**
PKT (150) \$2 ½ LB. \$5 1 LB \$9

Quickpick Pinkeye 56-60 days. Erect, determinate, non-vining bush type plant. Highly synchronous pod set. Excellent yield. Immune to Georgia isolate of black eye cowpea mosaic virus. Developed by Louisiana AES. **PKT (150) \$2 ½ LB. \$5 1 LB \$9**

Red Ripper Bradshaw Heirloom Collection Crop Failure

Red Ripper 90-100 days. Upright vining plants produce high yields of excellent eating quality fresh or dried **PKT (150) \$2 ½ LB. \$5 1 LB \$9**

Whippoorwill Bradshaw Heirloom Collection Source: John Coykendall, Knoxville, TN (originally from Lowery Langston in Jefferson County, TN). The Langston family broadcast the seeds in the cornfield for a fall crop and for animal forage. Eat green or dry. **Organic PKT (100) \$3 (200) \$5**

White Acre 62 days. A small seeded white cream pea that has been around for a while. About half the size of a blackeye and tedious to shell by hand. Vigorous growth habit, heavy yields and superior flavor. **PKT (200) \$2**

Yardlong or Noodle Asparagus Bean – 75 days. This **Bradshaw Heirloom Favorite** is actually in the same species as cowpeas. Harvest long 24" slender, tender pods in the immature stage and stir fried or cook mature dry peas. Produces prolifically in late summer-early fall. Pole habit. **PKT (50) \$3 (100) \$5**

PEPPER Heat or pungency of peppers are rated in Scoville Heat Units (SHU- 0 to 300,000). Hot growing conditions, full sun and adequate but not excessive moisture generally promote pungency. Too much water, nitrogen or low temperatures will drain the taste. Fruits ripening at 85°- 95° have more pungency than those maturing at 65° - 70°. The pungency increases tenfold when the fruits are dehydrated.

Alma Paprika 70-80 days. Excellent for drying and grinding or may be eaten fresh. Slightly warm & sweet. Pods ripen from cream-white to orange to red. **PKT (25) \$2**

Anaheim Chile 80 days. Heavy bearing, bushy 2-2½ foot plants bear plenty of deep green, medium-thick fleshed fruits. The 8" x 1½" peppers are moderately pungent and mature to a beautiful red color. Great for drying or frying. **PKT (50) \$2**

Ancho Poblano Heirloom Large heart-shaped fruit, turns from green to red. Sweet distinctive flavor. 4-6" long. Medium hot. **PKT (50) \$2**

Caribbean Red Habanero "Tongue-blistering" Petoseed's habanero pepper has a wonderful, distinct flavor with tropical tones, but "this hot baby" delivers a nuclear blast. 445,600 Scoville units (nearly doubling the heat of most habanero varieties). **PKT (25) \$2 TREATED SEED ONLY**

Carolina Cayenne 70 days. Home garden and commercial use. Fruit excellent for pickling, sauces, dehydration, and fresh market. Mature fruits are a bright, deep red color and are quite pungent (80,000-100,000 SHU). Produces excellent yields and high level of resistance to southern rootknot nematode. Plants are strong, uniformly branched, and may reach a height of 24-36 inches. Clemson & USDA. **PKT (50) \$2**

Charleston Hot Cayenne Developed by USDA Vegetable Lab, Charleston, SC. Ideal for home gardeners who want a high yielding compact plant (18"-24"). Pepper starts out yellow-green, changes to golden yellow, bright orange, and then to a deep red at maturity. Mature pods are about 5-6" long and very hot (100,000 Scoville heat units). Matures in 65 - 75 days and has resistance to many types of rootknot nematodes. **NOTE: Normal foliage color is a yellow green. Please do not mistake this for a nitrogen deficiency.**
PKT (50) \$2

Chiltepin 98 days. **Heirloom.** Wild species (*capsicum anuum var. glabriusculum*) from Mexico. Very hot but heat variable (50,000-200,000 SHU) depending on growing season and location. Small pea size peppers with unique flavor ripen from green to orange to red. **PKT (25) \$2**

Cowhorn Hot Cayenne NEW 80 days. **Heirloom.** Curved 6-10" peppers resemble a cow horn. Thick-walled peppers turn bright red when mature. Excellent for sauces or drying. **PKT (50) \$2**

Giant Thai Hot 70 days. The 3-4" peppers mature from green to red, with both colors present at once on the plant. 6000 SHU. **PKT (50) \$2**

Habanero 80-90 days. **Super Hot!** 200,000 - 300,000 SHU. Aka "Scotch Bonnets". Wrinkled dark green peppers ripen to a bright orange. Plants grow 3-4 feet tall. Productivity erratic in the North. **PKT (50) \$2**

Jaloro 70 days. Yellow jalapeno pepper developed by Texas A&M. Fruit is a beautiful golden yellow before turning orange then red, making for a beautiful show on compact plants. Just as hot as regular jalapenos. Plants are resistant to six viruses that threaten peppers. **PKT (25) \$2**

Jalapeno M 72 days. 3 ½" peppers mature from green to red on 26" plant. Very prolific. 5,000 SHU. **PKT (50) \$2**

Long Red Slim Cayenne **NEW** 75-80 days. **Heirloom**. Heavy producer of 4-6" long by ¼" thick peppers. Hot (50,000 Scoville heat units) peppers are excellent for pickles, hot sauce, drying, and in chili and salsa. **PKT (50) \$2**

Mulato Isleno 80-90 days. The fat, 6" x 3" **poblano** type peppers are mild and chewy, with a very distinctive flavor. Fruits mature from green to deep red/black color. Excellent for salsa, roasting & stuffing. **PKT (50) \$2**

Nu Mex Big Jim 83 days. Excellent green & red chile. Large smooth fruit 2" at the shoulder tapering 8-10" to a blunt end. Heat varies from mild to hot. Sets fruit under hot, dry conditions. **PKT (50) \$2**

Nu Mex Joe E. Parker Use for green and red chile production. Fruit 8" long and 1¼" wide. Mild pungency (800 SHU). Excellent chile flavor. **PKT (50) \$2**

Tabasco 75 days. Very Hot (40,000+ SHU). Slender yellow-green fruits 1½" long. **PKT (50) \$2**

TAM Mild Jalapeno 1 65-70 days. Compact plants (24"-30") with multiple virus resistance. Strong pepper flavor & aroma make this pepper desirable for fresh consumption, pickling or picante sauce. Mildly pungent (1100 SHU). **PKT (50) \$2**

BELL PEPPER California Wonder 75 days. This large, thick walled, juicy, sweet pepper is one of the most popular. 4" green peppers turn bright red. **PKT (50) \$2**

Canary Yellow 100 days. 3 ½" long by 4" wide peppers mature from green to yellow. Resistant to Tobacco Mosaic Virus. **PKT (50) \$2**

Chocolate Beauty 67 days green/88 days mature chocolate. Medium-large, smooth 3&4 lobed fruits. Tobacco mosaic resistant. **PKT (25) \$2**

Coral Belle **NEW** 85 days. Produces 4' by 3 ½", four lobed orange fruit. Mid-thick walled with mild, sweet flavor. **PKT (25) \$2**

Golden Cal Wonder 70 days Same as California Wonder with a bright gold, changing to orange-red when mature. **PKT (50) \$2**

Keystone Giant 78 days. A tasty variety known for its 5 inch thick, dark green flesh and heavy yields. **PKT (50) \$2**

Yolo Wonder 75 days. Two foot plants produce thick walled green peppers that mature to a beautiful red color, with dense foliage to help protect against sun scald. Larger & more mosaic resistant than Cal Wonder. **PKT (50) \$2**

MISC PEPPERS

Cubanelle Sweet Fryer 70 days. Sweet 5" long by 2" wide fruit. Thin-walled for frying. Yellow-green fruit turns red-orange. **PKT (50) \$2**

Hungarian Yellow Wax Sweet 70 days. Sweet 6" long fruit have a waxy flesh, tapering to a blunt tip. Light green fruit ripens to yellow and red. **PKT (50) \$2**

Hungarian Hot Wax 70 days. **Heirloom** Mexican favorite used in salsa and soups. Medium to hot fruits are sweet, 5' long and turn from yellow to orange to red. **PKT (50) \$2**

Pepperoncini 70 days. An Italian **Heirloom**, bushy and vigorous plants yield prodigious quantities of slender 3"- 5" sweet green peppers that turn red and become even sweeter. Use fresh, chopped in salads, served with dips or breads, or pickled. **PKT (50) \$2**

Pimento 65-90 days. Upright 30" plants produce 3 x 2 ½" smooth, bright red, heart shaped, and very sweet fruit. **PKT (50) \$2**

Red Cherry Sweet **NEW** 80 days. The 1-1½" slightly oblate sweet peppers mature from green to red. Pickle or eat fresh. **PKT (50) \$2**

Sweet Banana Pepper 65 days. Mild & sweet 6" peppers. Pick yellow fruit early or let mature to orange and then a deep red color. **PKT (50) \$2**

PUMPKIN Big Max 120 days. Slightly rough, red-orange skinned fruits, weighing up to 70lbs, have bright yellow-orange flesh. Pies, canning or jack-o-lanterns. **PKT (25) \$2**

Cinderella aka Rouge Vif d'Etampes 125 days. French **Heirloom** pumpkin with unique red-orange skin. Fruits are deeply ribbed and flattened resembling a wheel of cheese. 6" tall x 18" wide. Very decorative, but difficult to carve. Great for pies and baking. **PKT (15) \$2**

Connecticut Field 110 days. This Native American **Heirloom**, predating 1700, produces 15-25 pound, twelve inch globe shaped fruit with flattened ends. Perfect for Halloween decorating. Sweet flesh is great for pies. **PKT (25) \$2**

Howden 115 days. **Heirloom** pumpkins weigh 10-20 lbs with deep orange fruits. Round symmetrical fruits make great jack-o-lanterns. High yielder and good keeper. **PKT (15) \$2**

Jack O'Lantern 100 days. Medium-orange with shallow ribs the fruit tend to be 10 inches in diameter and 10-18 pounds. Flesh is sweet, light in color and fine-grained enough for cooking. **PKT (25) \$2**

Mammoth Gold 110 days. An American **Heirloom** variety from Kentucky. 40-60 lb pumpkins are irregular globe shaped, golden orange with smooth surface and thick pale orange flesh. Great for carving. **PKT (25) \$2**

Neck Pumpkin Bradshaw Heirloom Collection A buff colored squash with a very long neck. The thick, orange fleshed fruit measures 5" x 24" with a 9" bulb. Sweet & good for pies. The flesh is cooked much like butternut squash. **PKT (15) \$2**

Seminole Pumpkin Bradshaw Heirloom Collection Source: J. Nicholson, Anderson, SC. As the name implies, the Seminole Indians of southern Florida perpetuated this pumpkin. Small pumpkins (the size of a basketball) with a light salmon pink rind develop in late summer and fall. A much smaller inner cavity contains very flat seed. Foliage has interesting silvery variegations. Thick beige flesh is excellent for pies. **PKT (10) \$2**

OZebbs 110 days. **Heirloom** pumpkins weigh 20-30 lbs with unique orange skin and a long wispy handle. High yielder and great baker. **PKT (25) \$2**

Small Sugar 105 days. Fruit is 6-8" in diameter and weighs about 6 lbs. The bright orange skin is good for carving. Sweet flesh has excellent flavor outstanding for processing and making pies. **PKT (25) \$2**

Green Striped Cushaw 90-110 days. Native to North America this **Heirloom** was introduced in the late 1800's. 10-12 pound, whitish-green fruit with mottled green stripes produce up to 18 in. oblong shape with crooked necks and 10 in. bulbous bottoms. The light yellow flesh is slightly sweet, thick, medium-coarse and fibrous. The large, vigorous vines are resistant to squash vine borer. Great for pies, baking and fall pumpkin sales. **PKT (15) \$2**

Orange Striped Cushaw 110 days. Pear shaped with crookneck, 25-30 lb fruit are creamy white with gold/orange stripes, hard thin smooth rind, fine grained sweet golden flesh is excellent for baking or pies, good keeper. **PKT (15) \$2**

White Cushaw 95-110 days. White skin with pale yellow background, fruits 15-25 lbs., sweet pale yellow flesh, good for canning and baking pies. This **Heirloom** may have been available before 1860. **PKT (15) \$2**

RADICCHIO Palla Rosa Firm, red heads with attractive white veins or sow like leaf lettuce and harvest young, slightly bitter leaves for salad mixes. **PKT (500) \$2**

RADISH Black Spanish Round 60 days. **Heirloom** introduced in 1824. 3-4" globe shaped winter radish. Black skin, solid, crisp, pungent white flesh. **PKT (500) \$2**

Champion 25 days. **Heirloom** 1957 All-America Selection. Smooth & round, with bright scarlet skin. Crisp, mild flavored with white flesh. Grows to the size of a silver dollar. Slow to become pithy. Suited for spring and fall plantings. **PKT (1000) \$2**

Cherry Belle Heirloom 25 days. 1949 All-America Selection. Round roots are brilliant red with crisp, white and mildly pungent flesh. **Organic PKT (300) \$2**

Early Scarlet Globe 25-30 days. Deep globe, bright red skin, white flesh, bright green 2-3" tops. Excellent for salads. **PKT (1000) \$2**

Easter Egg 30 days. Multicolored radishes with shades of red, pink, purple and white all with tasty, crunchy white flesh. **PKT (500) \$2**

French Breakfast Heirloom 30 days. 2-3" oblong roots are scarlet with a white tip. Tender, mild and cold hardy. **PKT (1000) \$2**

Pink Beauty 27 days. A beautiful round pink radish that resists pithiness. White flesh is sweet, mild & tasty. A must for all radish growers! **PKT (500) \$2**

Purple Plum 28 days. 1-1½" globes have bright purple skin, firm white, crisp flesh, sweet and mild all season, never pithy or hot, hardy and adaptable. **PKT (500) \$2**

Red Silk 28 days. Excellent quality, fancy appearance with smooth, red skin, dense, white flesh. Upright, medium-sized tops. Good for low pH soils. **PKT (300) \$2**

Sparkler 25 days. A home garden favorite. 1-1.5 inch round red and white bicolor radishes. Flesh is very crisp, sweet and flavorful. **PKT (1000) \$2**

White Icicle 30 days. A mild, flavorful variety that produces tapered 6" long x ¾" diameter roots. Crisp, white flesh stays solid, even in warm weather. **PKT (1000) \$2**

RHUBARB Glaskins Perpetual Open pollinated all-purpose rhubarb that can be raised from seed. Fast growing, excellent flavor with slender bright red stalks. Grow as an annual in the deep south. Start seed indoors and transplant after last frost. **PKT (50) \$2**

RUTABAGA America Purple Top 90 days. This **Heirloom** has been the standard for home and market use since being introduced before 1920 as an improved strain of Purple Top Yellow. Purple top roots should be harvested when 4 to 6" in diameter. Mild, yellow, fine-grained flesh turns orange when cooked. Use bluish green leaves for greens. Excellent storage quality. **PKT ½ oz. (5,000) \$2**

SPINACH Bloomsdale Heirloom 40-60 days. Introduced in early 1900's. Vigorous upright plants with savoyed, crumpled dark green leaves. Fine quality, tender and excellent flavor. Slow to bolt. Adapted for late spring & summer plantings. **PKT (1000) \$2**

Giant Nobel 50 days **Heirloom** plants are very large and spreading in habit. Plant in late spring (it is slow to bolt) for heavy yields of giant, thick, dark green leaves. Excellent canning variety. Bred by inbreeding a monoecious plant found in the 'Gaudry' variety and released by Zwaan and Van der Molen, Voorburg, Netherlands in 1926. An All-America Selection winner in 1933. **PKT (500) \$2**

New Zealand 60 days. **Heirloom** from England dating back to the late 1700's. Not a true spinach but will produce a spinach-like crop in hot weather. Because of its heat tolerance and resistance to bolting, this is a summer substitute for conventional spinach. Plants have a bush-like habit and distinctive triangular leaves. Use the succulent leaves and young stems fresh in salads or cooked. Grows as a perennial in mild winter areas. May be difficult to start. Soaking seeds in warm water for two to eight hours prior to sowing may help soften the seed coat and improve germination results. May take a couple of weeks for germination to occur. Keep soil moist until germination occurs. **PKT (50) \$2**

Purple Orach NEW Atriplex species aka Mountain or French Spinach. Not a true spinach but a warm season alternative with a spinach like flavor. Hardy annual that grows upright to 4' tall. Beautiful edible landscape plant. **PKT (250) \$2**

SQUASH Early Prolific Straightneck (Summer) Heirloom 45-50 days. 1938 All-America Selection. Bush type. Fruits are slender and club shaped, creamy yellow turning golden when ripe. Best harvested small 4"-6". **PKT (60) \$2**

Yellow Crookneck (Summer) Heirloom 55 days. Flavor is unbeatable. Large, bushy plant is a heavy yielder of bright yellow crookneck fruit. Best picked small (4-5") as skin gets warty as fruits get larger. **PKT (60) \$2**

Early White Bush Scallop (Summer) Heirloom from the 1700's. Patty Pan type, early, pale greenish white pie shaped scalloped fruits, fine grained fine flavored white flesh, 3" deep x 5-7" diameter, smooth, up to 2½ lbs. **PKT (25) \$2**

Yellow Bush Scallop (Summer) Heirloom 49 days. Patty Pan scalloped golden yellow squash 7" diameter. Easy to grow and rarely bothered by insects. Creamy texture and very flavorful. Suitable for home garden and market growers. **PKT (25) \$2**

Blue Hubbard (Winter) Heirloom 120 days. Best choice for winter storage! **Heirloom** Very sweet fine-grained yellow-orange flesh. 12-20lb blue-green squash **PKT (15) \$2**

Burgess Buttercup (Winter) Heirloom 100 days. **Heirloom** introduced in 1932. Very sweet, thick, fine-grained orange flesh with excellent flavor. Fruits are flattened turbans, approximately 5-7" in diameter, 4-5" tall and weigh 3-5 lbs. Rinds are dark green with slight ribs and a "button" on the blossom end. Bush plants. **PKT (25) \$2**

Butternut (Waltham) (Winter) Heirloom 100 days. 1970 All-America Selection. Vigorous vining type plant produces 7-9" light tan blocky fruit. Very uniform fruit. Rich orange color flesh with high cooking quality, excellent flavor and stores well. **PKT (25) \$2**

Delicata (Winter) Heirloom 100 days. **Heirloom** released in 1894. Still popular because of its sweet potato-like flavor. Cream colored with green striped fruits are 3" in diameter and 7" long. **PKT (25) \$2**

Ebony Acorn (Winter) 100 days. Plant produces high yields of 1½ lbs green-black squash with yellow flesh. **PKT (25) \$2**

German Aboveground Sweet Potato (Winter) Bradshaw Heirloom Collection 115 days. This interesting winter squash gets its name from the fact that it is shaped somewhat like a sweet potato. It can be grown either on a trellis or it can be allowed to run over the ground in a large unrestricted area. 18-36" fruit are 6-10" in diameter and tapered at both ends like a sweet potato. The squash will keep for months at room temperature. Very tasty in a number of holiday dishes. **PKT (15) \$2**

Green Hubbard (Winter) Thick sweet, dry, fine grained orange flesh. Excellent flavor and keeper. Can or freeze. **PKT (15) \$2**

Sweet Dumpling (Winter) 90-105 days. Compact (5-6') plants produce high yields of 3-4" ½ lb. size fruit that are ivory with dark green stripes Sweet flesh is golden. Stuff with meat and bake like a bell pepper or prepare like squash. Very productive & keeps well. **PKT (25) \$2**

Sweet Meat (Winter) 90-110 days. **Heirloom** with hard slate-gray skin. 9"x5" fruit weigh 10-15 lbs. Flesh is golden yellow, sweet, dry and fine grained (stringless). Vigorous vines need lots of room. Stores well and may be baked or made into pies. **PKT (25) \$2**

Table King Bush Acorn (Winter) 80 days. 1974 AAS winner. One of the finest winter acorn squash that will produce loads of 2 lb fruit on compact bush. Glossy, dark gray-green, high quality and taste. Fantastic keeper. **PKT (25) \$2**

Table Queen (Winter) 80 days. **Heirloom** introduced 1948. 5 x 4" acorn-shaped 1-2 lb. fruits. Dark-green rind, fine-textured, golden-yellow sweet flesh. 3-8 fruits per plant. **PKT (25) \$2**

Vegetable Spaghetti (Winter) 70-110 days. Vigorous spreading vines. Round cylindrical buff tan fruits, 8-12" long x 5-6" wide (2-3 lbs). Yields 5-7 per plant. Harvest when skin changes from cream to buff. Store up to 6 months. Use as a low calorie spaghetti substitute. **PKT (25) \$2**

Black Beauty (Zucchini) 45-50 days. Bush type zucchini. Long, straight, slender fruit with slight ridges, black-green color. Flesh greenish white with very good texture and flavor. Best when 6-8". **PKT (40) \$2**

Cocozelle (Zucchini) 45-60 days. Pre-1900 **Heirloom** this Italian bush zucchini produces 10-12" long and cylindrical young fruits that are dark green with light-green stripes and the flesh is greenish-white and firm. Best quality fruits are harvested when 6-8" long. **PKT (40) \$2**

Costata Romanesco (Zucchini) NEW 55-60 days. Italian **Heirloom** prized for its creamy, sweet, tender nutty flavored flesh. 6-8" medium-green fruit have pale green ribs with flecks. Good disease resistance. **PKT (40) \$2**

Grey (Zucchini) 49 days. **Heirloom** 6-8" fruits with gray-green mottled skin. Open semi-spiny bush plant with heavy early yields. Production is extended over time, rather than concentrated at once. Excellent home garden variety. Introduced in 1957. **PKT (40) \$2**

Ronde de Nice (Zucchini) 50 days. **Heirloom** Green with white speckling, these round zucchinis from the south of France have long been a fresh market favorite. Harvest when they are a bit larger than golf balls or even larger to stuff with your favorite filling. Best flavor when 3-4" in diameter. Freezes well. **PKT (40) \$2**

He thrives before the sun, and his shoots spread out over his garden Job 8:16

SWISSCHARD Fordhook 60 days. The broad, dark green, heavily crinkled leaves of this **Heirloom** have excellent flavor and quality and grow on broad, thick, white stalks. **PKT (300) \$2**

Lucullus 50-60 days. Vigorous upright plants, heavily crumpled savoyed light green tasty leaves. Stands hot weather well. Produces until frost. Cook mid-rib like asparagus. **PKT (300) \$2**

Oriole NEW 60 days. **Heirloom** Beautiful plant with dark green, medium-savoyed leaves and golden orange stems. Sweet, mild taste. Good cold tolerance. Beautiful and tasty in salads. **PKT (300) \$2**

Rainbow 50-60 days. A tender variety whose five colors (orange, yellow, pink, white, and red) stalks make it very ornamental. **PKT (300) \$2**

Ruby Red 58 days. Tender, sweet chard with delicious red stalks, dark green, crumpled leaves. Beautiful and tasty in salads. **PKT (300) \$2**

TOMATO Fusarium wilt= FW Verticillium wilt=VW (I)=Indeterminate

Amish Paste (I) 85 days. Amish **Heirloom**. Produces 6-8 oz. red fruits that are oxheart to almost teardrop-shaped. Meaty fruits are juicy and have really outstanding flavor. Good for sauce or fresh. **PKT (50) \$2**

Arkansas Traveler (I) 87 days. Pre-1900 **Heirloom** produces medium-size pink, flavorful tomatoes under drought and high heat. **PKT (50) \$2**

Beefmaster VFN (I) 80 days. Perfect slicing **Hybrid**. Produces up to 2 lb, smooth, slightly ribbed fruit with outstanding rich flavor. **PKT (25) \$3**

Beefsteak 90 days. (I) Extra-large (12 oz), meaty, ribbed, deep-scarlet fruit. **PKT (50) \$2**

Betterboy VFN (I) 75 days. Widely adapted, high yielding **Hybrid**. Bright red fruits up to 1 lb. Disease resistant. **PKT (25) \$3 TREATED SEED ONLY**

Big Boy (I) 79 days. **Hybrid**. Smooth skinned, firm and very tasty 12-16 oz fruits are scarlet red with thick walls and meaty flesh. **PKT (25) \$3**

Black Cherry Tomato 65 days. 1 oz. black cherry tomatoes with rich tomato flavor. **PKT (50) \$2**

Black Krim (I) 80-90 days. Dark brown-red large tomatoes 10-12 ozs. Very rich flavored. Color darker in hot weather, and fruit seems to set well in the heat, but prone to cracking. Heavy producer. **Heirloom** from Black Sea of Russia. **PKT (50) \$2**

Organic 1/2 oz (5,000) \$2

Shogoin NEW 50 days. Japanese **Heirloom** turnip grown for mild green tops and roots for soups, salads, pickling & stir fries. **PKT 1 oz (10,000) \$2**

HERBS Amaranth Red 60 days. **Heirloom** leaf vegetable. Use young amaranth greens raw in salads and cook the mature plants. **PKT (1000) \$2**

Anise Annual. Cultivated for culinary and medicinal properties. Seeds have a strong licorice flavor and slightly sweet. One of the oldest known spices in England that first appeared in the Grocers' Company of London. Added to bread and sausage in Italy for centuries. Medicinal: Hot tea helps break up bronchial mucous. Carminative - a digestive aid for relief of gas and cramping. **PKT (500) \$2**

Arugula/Roquette Heirloom 50 days. Popular spicy salad spiker. Long, dark green lobed leaves form a loose open bunch. Unique nutty flavor similar to watercress. Use aromatic, leaves and flowers in salads, tomato recipes. Plant in spring and early fall. **Organic PKT (2000) \$2**

Genovese Basil 90 days. Annual. 2" leaves prized for flavor & aroma. Great for pesto sauces. 24-30" plants slow to bolt. **PKT (500) \$2**

Holy Basil aka Tulsi Ocimum sanctum NEW Heirloom. Annual plants produce 1 1/2" green leaves with purple stems. Used medicinally for digestion and immune stimulant. Common ingredient in Thai cuisine. **PKT (100) \$2**

Italian Large Leaf Basil Ocimum basilicum 78 days. Large plants very sweet, very fragrant, medium-dark green leaves up to 4 inches long. Height: 24-30 inches. Good for pesto and also excellent for fresh use. **PKT (500) \$2**

Lemon Basil Annual. Compact plant (24") with lemon fragrance. Use like sweet basil. Ideal for potpourri. **PKT (100) \$2**

Thai Basil Annual Lush, deep green leaves with purplish flowers buds and stems. Sweet basil scent with anise overtones. Use in curries, spicy stir-fry dishes, dips and salads. **PKT (100) \$2**

BeeBalm/Bergamot (Monarda fistulosa) Heirloom used by Native Americans to make tea. Citrus-flavored leaves can be minced and added to fruit and jellies. Beautiful purplish bracts, 24-30" tall, aromatic and colorful in fall. Excellent bee forage plant. Hardy perennial in zones 5-9. **PKT (100) \$2**

Borage An annual that produces 2-3' tall plants and is covered with blue, star-shaped flowers from June to August. Bees love the bright flowers which also make an attractive addition to summertime drinks, either floated on the surface or frozen into ice cubes. **PKT (100) \$2**

Caraway In the same family as parsley. Use seeds as a flavoring for rye bread, sauerkraut, sausage, cheese, cabbage and soups. Also, medicinally considered a digestive aid, has anti-spasmodic and anti-microbial properties. **PKT (200) \$2**

Catnip 80 days. Perennial. Use for mint teas or for amusing your cat. Vigorous, high yielding. **PKT (200) \$2**

Common Chamomile Annual produces small, sweet smelling, daisy like flowers. Use in herbal tea to aid in digestion & sleep inducer. **PKT(300) \$2**

Chervil Anthriscus cerefolium 65-75 days. Feathery parsley-like leaves with a delicate anise flavor used in French cooking and as a delicate garnish. This annual plant grows from 10 to 15" tall. Goes to seed quickly in the heat, and in fact, prefers a cool, moist and shaded location. To promote growth and a longer season, pinch off the tops. Successive plantings will give you a longer harvest. Use only the young green leaves. May be grown in a container. **PKT (500) \$2**

Chives 80 days. Perennial plants form grass-like clusters 6-12" tall. Mild onion flavor. Cut tops anytime for flavoring and salads. Use showy lavender-purple flower heads in late spring for garnish. **PKT (500) \$2**

Cilantro/Coriander 90 days. Popular 2-3' annual used in Chinese and Mexican cuisine. Fresh leaves are used in salsa called cilantro (60 days). Seed are used as a spice called coriander (90 days). **Organic PKT (300) \$2**

Corn Salad Mache Valerianella locusta Small dark-green leaves have a mild flavor and delicate texture. Hardy to 0 degrees but doesn't like heat. Sow in autumn to stand the winter. Whole plants are harvested for salad greens. Very high in vitamin C. Grows like spinach (except hardier). Make successive plantings every three weeks for a continuous supply. **PKT (1000) \$2**

Cress-Curled (aka Peppergrass) "Poor Man's Pepper", entire plant is edible. Young leaves can be used as a potherb, sautéed or used fresh in salads. Substitute young seedpods for black pepper. **PKT (2000) \$2**

Cress-Upland (aka Creasy Green) 50 days. Similar to watercress but easier to grow. Harvest year-round. Plants slow to bolt. 6-8" rosettes of dark green glossy rounded leaves. **PKT (2000) \$2**

Cutting Celery Use the celery flavored leaves in salads or in soups, stews, and mixed vegetables. Annual. **PKT (500) \$2**

Cumin Low growing. Fragrant foliage similar to dill. Use leaves in salad mixes and seeds to flavor soups and stews. **PKT (100) \$2**

Dill Bouquet A hardy annual native to the Mediterranean region. In Biblical times it was known by its Greek name, Anethon. The common name "Dill" comes from the old Norse word, dilla (to lull) and alludes to its historically medicinal use as a carminative. Typically used as a culinary herb. Fine, tender parts are finely chopped and added to sauces. Also used fresh in pickling. Seeds and leaves are also used dried as a seasoning. **PKT (500) \$2**

Dukat Dill NEW Hearty annual produces an abundance of flavorful blue-green leaves. Holds flavor longer than other dill and has sweetest taste of all the dills. **PKT (300) \$2**

Dill Mammoth Anethum graveolens 70 days. An attractive, 3-5' tall plant with a lovely aroma. The leaves, immature flower tops and mature seeds are an essential pickling spice. This easy-to-grow productive herb will reseed itself if allowed. As a companion plant, dill can enhance the growth of cabbages, onions, lettuce and tomatoes. Sow 1-2 seeds per inch in a sunny place in the garden in late spring or early summer. Use as a dried herb, harvest before the plant flowers. **PKT (500) \$2**

Enchiracea Purpurea (Common Purple Coneflower) Vigorous perennial plants used for ornamental and medicinal use. Flowers & roots used for support & stimulation of immune system. **PKT (100) \$2**

Florence Fennel 65 to 100 days. Sow directly in the garden in spring and harvest in the fall. The bulb has a sweet celery flavor with a hint of anise (licorice). The bulbs can be baked or boiled in soups or stews and can also be used raw in garden salads. The leaves and stalks are also useful for flavoring. **PKT (200) \$2**

Fenugreek Annual herb prized for its culinary (particularly Mediterranean dishes) and medicinal attributes. Use as an herb (dried or fresh leaves), as a spice (seeds), and as a vegetable (fresh leaves, sprouts, and microgreens). **PKT (200) \$2**

Horehound *Marrubium vulgare* **NEW** Perennial bushy plants grow 1-2 feet tall. Fresh leaves are gray, wrinkled, woolly and used to flavor teas, throat lozenges and candy. **PKT (200) \$2**

Feverfew Produces small, yellow and white, daisy like flowers. Use leaves for fevers, cramps & migraine headaches. Perennial easily self-seeds. **PKT (200) \$2**

Hyssop has been used for its medicinal properties since ancient times. Used as a gargle or in lozenge form, it helps to relieve sore throats and coughing. Use to improve the smell of kitchens and hospitals. Hyssop leaves are used to flavor chicken, salads, soups, liqueurs and stews. Essential oil used in perfumes. Attracts bees, butterflies and hummingbirds. Plants grow 18-24". Perennial in zones 4-9. **Do not use while pregnant.** **PKT (200) \$2**

Lavender One of the best-known of the traditional aromatic herbs. Valued for its small lavender flowers and fragrant gray leaves, it has been grown and used in Europe since the twelfth century. Jefferson listed it for planting in the Monticello kitchen garden in 1794. Thrives in sunny locations where the soil is not too rich and water never puddles. Sow in late spring or summer. Winter-hardy in zones 6-9. **PKT (100) \$2**

Lemon Balm *Melissa officinalis* **NEW** This sweet lemon-mint scented herb used in tea, cooking, potpourri, cosmetics and medicinally. Annual plant grows 24-48". Cut back to promote new growth. **PKT (200) \$2**

Lovage Young leaves taste like celery. Use in salads or to season potato and poultry dishes. Also may be used as a digestive aid. Perennial. **PKT (100) \$2**

Oregano (Origanum vulgare) 90 days. Perennial. Use dry or fresh leaves in Italian, Spanish and Mexican cuisine. **PKT (200) \$2**

Italian Giant Parsley 90 days. Large, flat-leaved parsley, with intensive flavors. May be grown in the garden or in pots. **Organic PKT (500) \$2**

Moss Curled Parsley 80 days. Compact plant with bright green, deeply cut and finely divided leaves. Very high in vitamins and minerals. Perfect for flavoring and as garnish. **PKT (1000) \$2**

Triple Curled Parsley **NEW** Annual 10-12" tall plant with dark green closely curled leaves. **PKT (500) \$2**

Peppermint Very aggressive Perennial plants. Used in potpourri and to flavor tea, candy, and medicines. **PKT (100) \$2**

Rosemary Attractive evergreen shrub with grey-green pinnate leaves with a spicy flavor. Perennial in zones 8-10. **PKT (50) \$2**

Sage Classic culinary herb for flavoring dressings, meats and sauces. Attractive grey-green woody/shrubby plant with beautiful mauve flowers make attractive landscape plants. Perennial in zones 5-10. **PKT (100) \$2**

Salad Burnet A hardy perennial, great for novice gardeners and gourmets. Attractive plant looks like rustic maiden hair fern and can be planted in rock gardens, flower beds, and containers. Leaves have a cucumber flavor and are added to salads, cold summer drinks, chopped and mixed with butter for a gourmet spread, and used as a garnish instead of dill with fish. Easy to grow. **PKT (300) \$2**

Soapwort *Saponaria ocymoides* **NEW Heirloom**. Herbaceous hardy perennial plant has lance-shaped leaves with soft, pink/white flowers. Excellent ground cover. Used as a cleaning agent and medicinally. **PKT (200) \$2**

Spearmint **NEW** Perennial **Heirloom** brought to America by the colonists. 12-36" tall plants spread rapidly and produce lavender-pink flowers during the summer. Used in cooking, potpourri and medicinally. **PKT (200) \$2**

Stevia *Stevia rebaudiana* 110-120 days Use very sweet leaves (fresh or dried) as substitute for sugar. Sub-tropical plants may be grown as an annual. Protect plants when temperatures fall below 45 degrees F. **CROP FAILURE**

St John's Wort Fragrant, rounded, hardy shrubby perennial that grows 1' to 3'. Leaves are pale green with black splotches. Lemon scented yellow flowers appear in summer to early autumn. **PKT (200) \$2**

Summer Savory Annual repels insects in the gardens which makes it a candidate for companion plantings. Used as a peppery flavoring for salads, soups, stuffing, sausage, and gravy. Surface sow as it requires light to germinate. **PKT (1000) \$2**

Sweet Marjoram 90 days. Annual. 12-15" plants. Flavor similar to oregano but sweeter and milder. Fresh or dry leaves may be used to flavor sauces, meats, pastas, fish and beans. **PKT (1000) \$2**

Large Leaf Sorrel *Rumex acetosa* A hardy perennial plant that produces 8" long narrow tender succulent green leaves with a slightly acid tang or lemony flavor that adds zest to salads. May also be cooked like spinach or used in soups. Leaves can be harvested over a long period of time. Remove flowering tops to keep leaves tender. **PKT (1000) \$2**

Russian Tarragon *Artemisia dracunculus* Favorite for its sweet, anise flavored leaves. Use in fish and poultry dishes. Productive, freezes and dries well, but hard to beat fresh. Perennial in zones 3-8. **PKT (100) \$2**

Mexican Tarragon/Mint *Tagetes lucida* **NEW** Anise-like flavor makes it a substitute for French Tarragon. Produces yellow, single, marigold-like blossoms on 24" tall and 12" wide annual plant. **PKT (100) \$2**

Thyme One of most versatile herbs used in cooking. 16-20" plants with a sprawling habit. Perennial in zones 5-8. **PKT (100) \$2**

Creeping Thyme Sturdy, drought tolerant, aromatic perennial can withstand light foot traffic. Slender creeping stems, round leaves, lavender blooms. **PKT (200) \$2**

Wormwood *Artemisia absinthium* **NEW** Attractive perennial with feathery grey green foliage and bright yellow flowers. Excellent landscape plant but generally considered a poor companion plant for most edible vegetables and herbs. Foliage used in bouquets and dried wreaths. Used medicinally as a digestive aid and as ingredients in liqueurs. **PKT (200) \$2**

CHEROKEE CEREMONIAL TOBACCO *Bradshaw Heirloom Collection* This is the original *Nicotiana rustica* used by the Cherokee Indians during various ceremonies, rites of passage, etc. A small growing tobacco, it grows about knee high with several stalks arising near the crown. A rather pervasive pungent odor is released from the leaves during times of high humidity. **PKT (50) \$2**

SUNFLOWERS Autumn Beauty Mixture of fall colors on 5" flowers. 5-6 foot plants have heat and drought tolerance. **PKT (50) \$2**

Black Russian Plants grow to 12ft. with large 15-18" heads. Frequently used in bird seed mixes. Striped seed (gray and white). **PKT (100) \$2**

Incredible Dwarf The golden-yellow flower heads are 7-9 inches across on dwarf plants that are just 15-20 inches tall. **PKT (50) \$2**

Indian Blanket colorful and brilliant flowers come in many bicolor shades of rich reds, deep golds, mellow yellows and rusty rusts. Many flowers also display fluffy petals on the inner disc, making them almost semi-double. 4" blooms don't easily shed Great for cutting. Continuously blooming, this multi-branched variety will grow to 4-5 feet tall. **PKT (50) \$2**

Lemon Queen 100 days. Beautiful 4-6" lemon-yellow blooms with chocolate centers. Very unique; 5' tall plants produce many brilliant blooms. **PKT (50) \$2**

Mammoth Grey Striped 80 days **Heirloom** introduced prior to 1871. Large head with 9-12 foot stalks . Produces a large single head averaging 10 to 12" in diameter or larger. Seeds are rich in oil and protein, medium-large, thin-shelled, with gray and white stripes. Excellent bird feed. Space plants 18" apart. **PKT (100) \$2**

Maximilian Perennial sunflower that produces masses of 3" yellow-gold blooms from August to frost. Plant height 3-7'. **PKT (100) \$2**

Peredovik 90-100 days. Black sunflower can grow from 4 to 6 feet high forming small heads full of **black seed** high in oil content. Excellent feed for all game birds, especially doves. **PKT (500) \$2 1LB \$6 5LB \$20**

Red Sun Multiflora type bears 5-6" deep dark orange-red blooms with a hint of yellow around the brown center. 5-6 ft. plants. **PKT (50) \$2**

Skyscraper Bright 14" yellow flowers on 10-12 foot plants. Seeds make a tasty treat or use as bird feed. **PKT (100) \$2**

Teddy Bear Small bushy sunflower grows 2-3 feet with double yellow 3-6" blooms. Great for cut flowers. **PKT (50) \$2**

Torch or Mexican Sunflower. 60 days. Fiery orange 2-3" flowers attract lots of butterflies all summer long until frost. A favorite because of its extremely long bloom period. Nice for fresh arrangements. Branching plants 4-6' tall. **PKT (50) \$2**

Velvet Queen 4-6 foot plants produce 6" velvety crimson flowers that will last 4 weeks, Great for cut flowers. **PKT (50) \$2**

MISC FLOWERS

Baby's Breath is related to the carnation. Excellent as a cut flower. This annual is easy to grow and will be one of the first to bloom in the spring. Annual Baby's Breath has larger white blooms than the perennial variety. Height: 12-24". Bloom season: spring and early summer. **PKT (2000) \$2**

Bachelor Buttons or Corn Flower Colorful mix of vivid blue, pink, purple, and white flowers. Height: 12-24". Bloom Spring-Summer.

Sales are prohibited in NC. PKT (800) \$2

Birds, Bees, and Butterflies Mix of some twenty bright, vibrant varieties of flowers that will attract wildlife and catch the eye of anyone passing by. **PKT (1,500) \$3**

Bishop's Flower Annual 4 ft. tall wildflower has a lacy flower head that blooms mid to late summer. Non-invasive alternative to Queen Anne's Lace. **PKT (2,000) \$2**

Black-Eyed Susan prefers full sun, but can tolerate partially shaded areas. The Black-Eyed Susan is very drought tolerant and makes an exceptional cut flower. Flower is yellow with a brown center. Height: 24-36". **PKT(4,000) \$2**

Blanket Flower or Firewheel Very hard and drought tolerant perennial. Showy bright red pinwheel flowers are edged with yellow. **PKT (300) \$2**

Butterfly Collection Six packets (50 seed each) of easy to grow Monarch Butterfly favorites. Zinnia, Cosmos, Sweet Alyssum, Indian Blanket, marigold and parsley (larval food/host plant). **PKT \$6**

Calendula or Pot Marigold Mix of orange and yellow flowers. Hardy annual. Edible flower petals are often added to salads for color. Height 12-24". Blooms Spring-Fall. **PKT (500) \$2**

Lance Leaf Coreopsis or Tickseed Bright yellow blooms on 24-36" perennial plants. Plant full sun or light shade. **PKT (500) \$2**

Plains Coreopsis is found as a native in many US states. Start outdoors in full sun to partial shade. The tall (24-48") variety produces yellow bicolored flowers with mahogany red centers in the spring and summer. Deadheading this flower will help to promote more, full blooms. **PKT (3,000) \$2**

Cosmos Mix of red, pink, purple and white flowers are native to Mexico and require full sun. Cosmos work well as cut flowers and are good container plants. The Cosmos seed is a popular source of food for birds. Height 24-40". Plant in the spring. Bloom season: Summer - Fall. **PKT (300) \$2**

Sulphur Cosmos does well in hot, arid climates. The red, orange and yellow flowers bloom spring-fall. Attract birds & make good cut flowers. 24 - 36" tall. **PKT (300) \$2**

Shasta Daisy An extremely resilient white perennial flower that is native to Europe, and will grow successfully in an area that provides full sun or light shade. May be planted in spring or fall. 16 - 30" tall. Blooms spring-summer. **PKT (1,000) \$2**

Painted Daisy famous for adding beautiful multi colored daisies with varying bands of other colors and a purple center. Plant in full sun to partial shade in the spring. Annual. Plant Height: 18-36". **PKT (1,000) \$2**

Four O'clocks Multi-colored blooms open in late afternoon. When frost threatens, you can dig the bulbous roots that have formed, save them (like dahlias or glads) for next spring. **PKT (40) \$2**

Impatiens 'Dwarf' Mix Large, individual and sometimes double flowers in a wide range of bright colors on 12 inch tall plant. Plant in sun - partial shade. Annual. **PKT (200) \$2**

Joe Pye Weed 5 ft. tall with large pink-purple clusters of flowers blooming in late summer. Attracts butterflies **PKT (500) \$2**

Lemon Mint Deep purple blooms irresistible to hummingbirds, bees and butterflies. Nice citrus smell. 3 ft. tall. Sun-light shade. **PKT (1500) \$2**

Marigold Mix "Cracker Jack" African/American marigold *Tagetes erecta* Another world favorite annual, great for kids' first gardens. Mixture of orange and yellow carnation-like flowers. Plant in full sun. 24"-30" tall. **PKT (600) \$2**

Marigold Mix "Sparky" French marigold *Tagetes patula* Mixture of red, orange and yellow flowers. Plant in full sun. 12-14" tall sturdy plants. **PKT (600) \$2**

Common Milkweed *Asclepias syriaca* Purple-pink flowers attract Monarch butterflies for egg-laying and serves as source of nectar for other butterfly species. Plant in sun-partial shade. **PKT (50) \$2**

Dwarf Jewel Nasturtiums stays low and blooms (orange, rich reds & yellow) profusely in the summer months. Edible flowers are sweet, mild spicy flavor, commonly used for garnish. Grow in full sun to partial shade. **PKT (30) \$2**

Shirley Poppy Mix Has red, pink, white and bi-color blooms in early to mid-season on a 2 ft annual plant. **PKT (5,000) \$2**

Scarlet Sage Bright red flowers in mid-summer similar to Salvia. 12-24" annual plant. Attracts hummingbirds and butterflies. **PKT (300) \$2**

Spider Flower *Cleome hassleriana* Tender annual that grows as tall as 5 ft. Use spider flower (pink/white) as a background plant and borders. Also good in mixed shrub plantings to fill in while shrubs mature. **PKT (200) \$2**

Moss Verbena Perennial in warmer climates with spreading stems that grow 12" tall. Has dense blue to violet pink flowers blooms in spring. **PKT (500) \$2**

Sweet Alyssum Produces sweet-smelling white flowers throughout the growing season on a 12-16" plant. **PKT (2,000) \$2**

Sweet William A relative to the Carnation. The white, red and pink sweet smelling flowers enjoy a moist and cooler climate in full sun to partial shade. Height 12-24". Plant in the spring. Biennial blooms in summer of second year after planting. **PKT (1,000) \$2**

Zinnias "Cut & Come Again" This is the standard mixture of solid color blooms. Bloom all summer. 18-24" tall. **PKT (300) \$2**

SWEET POTATO PLANTS

Beauregard Louisiana Agricultural Experiment Station release. Rose skin color, orange flesh and stores well. Produces more # 1 roots than Jewel. Resistance to white grub and soil rot (pox). Susceptible to wireworms and rootknot nematode. Early maturing (100 days).

O'Henry A white-skinned, cream-fleshed variant of Beauregard. Its maturity, disease resistance, and eating quality is similar to Beauregard, though the flesh is a little drier, but not as dry as some of the old white varieties. (110-115 days)

Bradshaw Heirloom Selected by Dr. David Bradshaw, this is his personal favorite. A vigorous grower and very productive. The rose-colored skin covers rich orange flesh. There may be slight variability in the flesh color, but the flesh is always richly sweet and creamy with very few strings. Many growers have reported white tail deer select other sweet potato varieties to browse, leaving the Bradshaw potatoes with little damage. Dr. Bradshaw says "This is the best sweet potato I've ever eaten!" Without a doubt, this is our most popular home garden variety. (110-120 Days)

ORDERING INFORMATION FOR SWEET POTATO PLANTS:

Plants will be shipped mid-May to early June.

Sorry, we cannot ship to California, Arizona, or Hawaii.

COST for PLANTS: \$14.00 for first dozen; \$5.00 for each additional dozen. (Price includes USPS Priority Mail - Call for UPS Optional 2nd Day Air or 3 Day Select rates). If you are interested in purchasing plants in large quantities (500 or 1000) please contact us for availability and price.

As you sow your seeds and plant your trees, you too are a part of the continuing creation of life and beauty. We are all in fact, gardening with God." Allan A. Swenson

PUSSY WILLOW, genus "Salix", are prized for their furry colorful catkins (buds) that emerge in early winter. Used in floral décor, landscaping, erosion control, windbreaks and land conservation projects. Pussy willows are easy to grow. You can easily start a pussy willow by rooting one of its branches or cuttings in February – April. Transplanted into the ground in late fall. We will provide you with instructions on how to root, grow and care for your own pussy willow plants. **Cuttings are sold in bundles of 6-8 cuttings.**

Available Varieties: All of our pussy willow varieties are locally grown by 2014 Carolina Farm Stewardship Association Farmer of the Year Walker Miller. Mr. Miller and his family own and operate "The Happy Berry".

French Pussy Willow: (*Salix caprea*) A native northern European selection which has become a favorite of the floral industry, highlighting white, glossy and long lasting catkins. Enjoys sun and water. Grows 12' to 18'. Stem production third year or sooner. Zone 4-8

Silver Giant Pussy Willow: (*Salix chaenomelodies*) A top favorite of many buyers producing long lasting reddish stems and extra-large showy silver catkins. Prolific with sun and damp soils. Grows 12' to 18' if not harvested annually. Production 3rd year or sooner. Zone 4-8.

Mount Asama: (*Salix chaenomelodies*) the most colorful catkins showing pale pinkish center surrounded by silky white outside. Grows 8' to 12'. Japanese origin. Shapes well following annual winter branch harvest.

Pink Pussy Willow: (*Salix discolor*) Catkin emerges late winter/early spring. Colorful catkins change into a silvery white. Sometimes referred to as the Easter Pussy Willow. Grow 8' – 12'. Zone 4 – 8

Japanese Fantail or Dragon Tail: (*Salix sekka*) A Japanese ornamental woody stem treasure. Sought by florists for the unusual and exotic shape and attractive small catkins. This willow produces unique, twisting stems and fall color unmatched in the willow family. Grows 8' to 12'. Zone 4-8.

Purple Heirloom or Prairie Willow: (*Salix humulis*). A showy upright willow with long flowing yellowish gold stems producing small attractive purple catkins that emerge becoming attractive off white to gray. Excellent color and shape for small to tall arrangements. Can be shaped to a topiary form or attractive in hedge or stand alone. Grows 6' to 10'. Zone 4-8.

All orders must be received by April 20, 2017. Prices include USPS Ground shipment. Cuttings will be shipped February 1 through April 30. Sorry, we cannot ship to Arizona, California, Hawaii or Oregon.

COST for CUTTINGS: Sold in bundles of six to eight cuttings of the same variety. \$15.00 for the first bundle; \$10.00 for each additional bundle of cuttings. (Price includes USPS Mail).

COVER CROP Buckwheat is a fast growing short-season cover crop. It establishes, blooms, and is ready for incorporation in 30 to 40 days. Buckwheat suppresses weeds and attracts beneficial insects and pollinators with its abundant blossoms. In the South it is best sown in May through August for cover crop use. **1 LB. \$3 5 LB \$10**

Velvet Beans *Bradshaw Heirloom Favorite* NOT FOR HUMAN CONSUMPTION. Legume that was widely grown until about 1900 as a **summer cover crop**. Vigorous running plants produce a mass of foliage that shades out Bermuda grass & nutsedge. Hardy, vigorous, and virtually pest free, it helps break the nematode cycle and adds nitrogen and organic matter. Plant seeds 3 ft. apart. **PKT (15) \$2 JUMBO PKT (40) \$5**

He took also of the seed of the land, and planted it in a fruitful field: he placed it by great waters, and set it as a willow tree. Ezekiel 17:5

NOTICE TO BUYER: LIMITATION OF WARRANTY

Heavenly Seed LLC (HS) warrants to the extent of the purchase only that the seed or plants we sell conform to the description on the label within recognized tolerance under state and federal laws. HS makes no warranty, expressed or implied, including merchantability or fitness for a particular purpose, nor does HS assume any obligation with respect to yield, freedom from seed borne disease, quality or tolerance to disease, insects, or growing conditions of the seed or the crop produced therefrom.

HS liability, whether contractual for negligence or otherwise, is limited to the replacement of the seed or plants or the refund of the purchase price under all circumstances. Nor shall HS be liable for any indirect, incidental, special or consequential loss or damage including amounts expended in using, growing, or harvesting the produce of such seed. The price of the seed is based on this limited warranty & liability. Prices of the seed would be higher if further liability coverage were required. Acceptance of the seed or plants by the buyer constitutes acknowledgment that the limitations and disclaimers herein set forth are conditions of the sale and constitute the entire agreement between the parties regarding warranty and/or any other liability. If not acceptable, return the seed (within 30 days) in their original package for a refund.
